9. **UNITED STATES TAX CONSIDERATIONS**

Section 871(m) Withholding Tax

The U.S. Treasury Department has issued regulations under which amounts paid or deemed paid on certain financial instruments that are treated as attributable to U.S.-source dividends could be treated, in whole or in part depending on the circumstances, as a "dividend equivalent" payment that is subject to tax at a rate of 30 per cent. (or a lower rate under an applicable treaty). We have determined that, as of the issue date of the Certificates, the Certificates will not be subject to withholding under these rules. In certain limited circumstances, however, it is possible for United States alien holders to be liable for tax under these rules with respect to a combination of transactions treated as having been entered into in connection with each other even when no withholding is required. United States alien holders should consult their tax advisor concerning these regulations, subsequent official guidance and regarding any other possible alternative characterisations of their Certificates for United States federal income tax purposes. See "*United States Tax Considerations – Dividend Equivalent Payments*" in the Base Prospectus for a more comprehensive discussion of the application of Section 871(m) to the Certificates.

EXAMPLES

THE EXAMPLES PRESENTED BELOW ARE FOR ILLUSTRATIVE PURPOSES ONLY.

For the purposes of each Example:

- (i) the Issue Price is 100 per cent. (100%) of the Aggregate Amount, the Aggregate Amount is up to NOK 100,000,000 and the Calculation Amount is NOK 10,000; and
- (ii) in respect of each Underlying Asset, the Autocall Level is 90 per cent. (90%) of the Asset Initial Price of such Underlying Asset, the Coupon Barrier Level is 80 per cent. (80%) of the Asset Initial Price of such Underlying Asset, and the Barrier Level is 60 per cent. (60%) of the Asset Initial Price of such Underlying Asset.

For the purposes of these Examples only, the Coupon Value Multiplicand is deemed to be 0.013. The actual Coupon Value Multiplicand will be determined by the Calculation Agent on or around November 27, 2020 and may be a lesser or greater amount than 0.013 (but shall not be less than 0.01). Therefore, as the actual Coupon Value Multiplicand may be lower than the deemed value used for the purposes of these Examples, the actual amounts received by investors may be less than the amounts stated in the Examples below.

COUPON AMOUNT

Example 1 – no Automatic Early Exercise but Coupon Amount: *The Reference Price of each Underlying Asset for the Valuation Date scheduled to fall on December 28, 2020 is greater than or equal to 80 per cent. (80%) of its respective Asset Initial Price. The Coupon Value Multiplier corresponding to such Coupon Observation Date is one.*

In this Example, the Certificates will not be exercised on such Valuation Date. A Coupon Amount per Certificate (of the Calculation Amount) will be payable on the Coupon Payment Date immediately following such Valuation Date, and such Coupon Amount will be an amount in the Settlement Currency equal to the *product* of (i) the Calculation Amount, *multiplied* by (ii) the Coupon Value Multiplier corresponding to such Coupon Observation Date, and further *multiplied* by (iii) the Coupon Value Multiplicand, i.e., NOK 130.

Example 2 – no Automatic Early Exercise and no Coupon Amount: *The Reference Price of one Underlying Asset for the Valuation Date scheduled to fall on December 28, 2020 is less than its Coupon Barrier Level and the Reference Price of each other Underlying Asset for such Valuation Date is greater than or equal to its respective Coupon Barrier Level.*

In this Example, the Certificates will not be exercised on such Valuation Date and no Coupon Amount will be payable on the Coupon Payment Date immediately following such Valuation Date.

AUTOMATIC EARLY EXERCISE

Example 3 – Automatic Early Exercise and Coupon Amount: *The Reference Price of each Underlying Asset for the Valuation Date scheduled to fall on May 30, 2023 is greater than or equal to its respective Autocall Level. The Coupon Value Multiplier corresponding to such Coupon Observation Date is 30.*

In this Example, the Certificates will be exercised on such Valuation Date, and the Automatic Early Exercise Amount payable per Certificate (of the Calculation Amount) on the Automatic Early Exercise Date immediately following such Valuation Date will be an amount in the Settlement Currency equal to the Autocall Event Amount, i.e., NOK 10,000. Additionally, a Coupon Amount per Certificate (of the Calculation Amount) will be payable on the Coupon Payment Date falling on such Automatic Early Exercise Date, and such Coupon Amount will be an amount in the Settlement Currency equal to the *difference* between (i) the *product* of (a) the Calculation Amount,

multiplied by (b) 0.39, minus (ii) the aggregate of the Coupon Amounts (if any) per Certificate (of the Calculation Amount) previously paid on the Coupon Payment Dates preceding such Valuation Date.

Example 4 – no Automatic Early Exercise but Coupon Amount: *The Reference Price of one Underlying Asset for the Valuation Date scheduled to fall on May 30, 2023 is less than its Autocall Level but greater than or equal to its Coupon Barrier Level, and the Reference Price of each other Underlying Asset for such Valuation Date is greater than or equal to its respective Autocall Level. The Coupon Value Multiplier corresponding to such Coupon Observation Date is 30.*

In this Example, the Certificates will not be exercised on such Valuation Date. A Coupon Amount per Certificate (of the Calculation Amount) will be payable on the Coupon Payment Date immediately following such Valuation Date, and such Coupon Amount will be an amount in the Settlement Currency equal to the *difference* between (i) the *product* of (a) the Calculation Amount, multiplied by (b) 0.39, minus (ii) the aggregate of the Coupon Amounts (if any) per Certificate (of the Calculation Amount) previously paid on the Coupon Payment Dates preceding such Valuation Date.

Example 5 – no Automatic Early Exercise and no Coupon Amount: *The Reference Price of one Underlying Asset for the Valuation Date scheduled to fall on May 30, 2023 is less than its Coupon Barrier Level, and the Reference Price of each other Underlying Asset for such Valuation Date is greater than or equal to its respective Autocall Level.*

In this Example, the Certificates will not be exercised on such Valuation Date and no Coupon Amount will be payable on the Coupon Payment Date immediately following such Valuation Date.

SETTLEMENT AMOUNT

Example 6 – neutral scenario and Coupon Amount: *The Certificates have not been exercised on an Applicable Date, and the Final Closing Price of each Underlying Asset is 80 per cent. (80%) or more of its respective Asset Initial Price. The Coupon Value Multiplier corresponding to such Coupon Observation Date is 60.*

In this Example, the Certificates will be exercised on the Final Reference Date and the Settlement Amount payable per Certificate (of the Calculation Amount) on the Maturity Date will be an amount in the Settlement Currency equal to 100 per cent. (100%) of the Calculation Amount, i.e., NOK 10,000. Additionally, a Coupon Amount per Certificate (of the Calculation Amount) will be payable on the Coupon Payment Date falling on the Maturity Date, and such Coupon Amount will be an amount in the Settlement Currency equal to the *difference* between (i) the *product* of (a) the Calculation Amount, multiplied by (b) 0.78, minus (ii) the aggregate of the Coupon Amounts (if any) per Certificate (of the Calculation Amount) previously paid on the Coupon Payment Dates preceding the Final Reference Date.

Example 7 – neutral scenario but no Coupon Amount: *The Certificates have not been exercised on an Applicable Date, the Final Closing Price of one Underlying Asset is 79 per cent. (79%) of its Asset Initial Price and the Final Closing Price of each other Underlying Asset is 80 per cent. (80%) or more of its respective Asset Initial Price.*

In this Example, the Certificates will be exercised on the Final Reference Date and the Settlement Amount payable per Certificate (of the Calculation Amount) on the Maturity Date will be an amount in the Settlement Currency equal to 100 per cent. (100%) of the Calculation Amount, i.e., NOK 10,000. No Coupon Amount will be payable on the Coupon Payment Date falling on the Maturity Date.

Example 8 – negative scenario and no Coupon Amount: *The Certificates have not been exercised on an Applicable Date, the Final Closing Price of one Underlying Asset is 59 per cent. (59%) of its Asset Initial Price*

and the Final Closing Price of each other Underlying Asset is 60 per cent. (60%) or more of its respective Asset Initial Price.

In this Example, the Certificates will be exercised on the Final Reference Date and the Settlement Amount payable per Certificate (of the Calculation Amount) on the Maturity Date will be an amount in the Settlement Currency equal to 59 per cent. (59%) of the Calculation Amount, i.e., NOK 5,900. No Coupon Amount will be payable on the Coupon Payment Date falling on the Maturity Date. **In this Example, an investor who purchased the Certificates at the Issue Price will sustain a substantial loss of the amount invested in the Certificates (other than any Coupon Amounts received prior to the Maturity Date, if applicable).**

Example 9 – negative scenario and no Coupon Amount: *The Certificates have not been exercised on an Applicable Date, the Final Closing Price of one Underlying Asset is zero per cent. (0%) of its Asset Initial Price and the Final Closing Price of each other Underlying Asset is 60 per cent. (60%) or more of its respective Asset Initial Price.*

In this Example, the Certificates will be exercised on the Final Reference Date and the Settlement Amount payable per Certificate (of the Calculation Amount) on the Maturity Date will be zero. No Coupon Amount will be payable on the Coupon Payment Date falling on the Maturity Date. **In this Example, an investor will sustain a total loss of the amount invested in the Certificates (other than any Coupon Amounts received prior to the Maturity Date, if applicable).**

What are the key risks that are specific to the Issuer?				
The Issuer is subject to the following key risks:				
<ul style="list-style-type: none">• The payment of any amount due on the Securities is subject to the credit risk of the Issuer. The Securities are the Issuer's unsecured obligations. Investors are dependent on the Issuer's ability to pay all amounts due on the Securities, and therefore investors are subject to the Issuer's credit risk and to changes in the market's view of the Issuer's creditworthiness. The Securities are not bank deposits, and they are not insured or guaranteed by any compensation or deposit protection scheme. The value of and return on the Securities will be subject to the Issuer's credit risk and to changes in the market's view of the Issuer's creditworthiness.• GSG and its consolidated subsidiaries ("Goldman Sachs") is a leading global investment banking, securities and investment management group and faces a variety of significant risks which may affect the Issuer's ability to fulfil its obligations under the Securities, including market and credit risks, liquidity risks, business activities and industry risks, operational risks and legal, regulatory and reputational risks.• GSI is a wholly-owned subsidiary of the Goldman Sachs group and a key banking subsidiary of the Goldman Sachs group. As a result, it is subject to a variety of risks that are substantial and inherent in its businesses including risks relating to economic and market conditions, regulation, Brexit, market volatility, liquidity, credit markets, concentration of risk, credit quality, composition of client base, derivative transactions, operational infrastructure, cyber security, risk management, business initiatives, operating in multiple jurisdictions, conflicts of interest, competition, changes in underliers, personnel, negative publicity, legal liability, catastrophic events and climate change.• GSI is subject to the Bank Recovery and Resolution Directive, which is intended to enable a range of actions to be taken by a resolution authority in relation to credit institutions and investment firms considered by the resolution authority to be at risk of failing and where such action is necessary in the public interest. The resolution powers available to the resolution authority include powers to (i) write down the amount owing, including to zero, or convert the Securities into other securities, including ordinary shares of the relevant institution (or a subsidiary) – the so-called "bail-in" tool; (ii) transfer all or part of the business of the relevant institution to a "bridge bank"; (iii) transfer impaired or problem assets to an asset management vehicle; and (iv) sell the relevant institution to a commercial purchaser. In addition, the resolution authority is empowered to modify contractual arrangements, suspend enforcement or termination rights that might otherwise be triggered. Governing law: The Securities are governed by English law provided that Norwegian law will apply with regard to the registration of VPS Registered Securities.

Status of the Securities:

The Securities are unsubordinated and unsecured obligations of the Issuer and will rank equally among themselves and with all other unsubordinated and unsecured obligations of the Issuer from time to time outstanding.

The taking of any action by a resolution authority under the Bank Recovery and Resolution Directive in relation to the Issuer could materially affect the value of, or any repayments linked to, the Securities, and/or risk a conversion into equity of the Securities.

Description of restrictions on free transferability of the Securities:

The Securities have not been and will not be registered under the U.S. Securities Act of 1933 (the "**Securities Act**") and may not be offered or sold within the United States or to, or for the account or benefit of, U.S. persons except in certain transactions exempt from the registration requirements of the Securities Act and applicable state securities laws.

No offers, sales or deliveries of the Securities, or distribution of any offering material relating to the Securities, may be made in or from any jurisdiction except in circumstances that will result in compliance with any applicable laws and regulations.

Subject to the above, the Securities will be freely transferable.

Where will the Securities be traded?

Application will be made by the Issuer (or on its behalf) for the Securities to be listed on the Official List and admitted to trading on the regulated market of the Nasdaq Stockholm AB with effect from at the earliest the Issue Date.

What are the key risks that are specific to the Securities?

Risk factors associated with the Securities: The Securities are subject to the following key risks:

The value and quoted price of your Securities (if any) at any time will reflect many factors and cannot be predicted. Depending on the performance of the Underlying Assets, you may lose some or all of your investment.

Risks relating to certain features of the Securities:

- The terms and conditions of your Securities provide that the Securities are subject to a cap. Therefore, your ability to participate in any change in the value of the Underlying Assets over the term of the Securities will be limited, no matter how much the price of an Underlying Asset may rise beyond the cap level over the life of the Securities. Accordingly, the return on your Securities may be significantly less than if you had purchased the Underlying Assets directly.
- The terms and conditions of your Securities provide that the return on the Securities depends on the "worst-of" performance of the basket of Underlying Assets. Therefore, you will be exposed to the performance of each Underlying Asset and, in particular, to the Underlying Asset which has the worst performance. This means that, irrespective of how the other Underlying Assets perform, if any Underlying Asset fails to meet a relevant threshold or barrier for the payment of interest or the calculation of any settlement amount, you may receive no interest payments and/or could lose some or all of your initial investment.

Risks relating to the Underlying Assets:

- *The value of and return on your Securities depends on the performance of the Underlying Assets.* The return on your Securities depends on the performance of one or more Underlying Assets. The price of an Underlying Asset may be subject to unpredictable change over time. This degree of change is known as "volatility". The volatility of an Underlying Asset may be affected by national and international financial, political, military or economic events, including governmental actions, or by the activities of participants in the relevant markets. Any of these events or activities could adversely affect the value of and return on the Securities. Volatility does not imply direction of the price of an Underlying Asset, though an Underlying Asset that is more volatile is likely to increase or decrease in value more often and/or to a greater extent than one that is less volatile.
- *Past performance of an Underlying Asset is not indicative of future performance.* You should not regard any information about the past performance of the Underlying Assets as indicative of the range of, or trends in, fluctuations in the Underlying Assets that may occur in the future. Underlying Assets may perform differently (or the same) as in the past, and this could have material adverse effect on the value of and return on your Securities.
- The performance of Shares is dependent upon macroeconomic factors, such as interest and price levels on the capital markets, currency developments, political factors as well as company-specific factors such as earnings position, market position, risk situation, shareholder structure and distribution policy, as well as business risks faced by the issuers thereof. Any one or a combination of such factors could adversely affect the performance of the Underlying Assets which, in turn, would have a negative effect on the value of and return on your Securities.

konsernet. Som følge av dette er det gjenstand for en rekke risikofaktorer som er betydelige og en naturlig del av virksomheten, inkludert risiko knyttet til økonomiske omstendigheter og markedsforhold, lovkrav, Brexit, ustabilitet i markedet, likviditet, kredittmarkeder, konsentrasjon av risiko, kredittkvalitet, sammensetning av kundebase, derivattransaksjoner, operasjonell infrastruktur, cyber-sikkerhet, risikostyring, forretningsinitiativ, virksomhet i flere jurisdiksjoner, interessekonflikter, konkurranse, endringer i underliggende virksomhet, personell, negativ publisitet, rettslig erstatningsansvar, katastrofer og klimaendringer.

- GSI er underlagt EUs krisehåndteringsdirektiv (Bank Recovery and Resolution Directive), som skal gjøre det mulig for en avviklingsmyndighet å iverksette en rekke tiltak i tilknytning til kredittinstitusjoner og investeringsselskaper som avviklingsmyndigheten vurderer står i fare for konkurs, og der slike tiltak er nødvendige i offentlighetens interesse. De tiltakene som er tilgjengelige for avviklingsmyndighetene er blant annet retten til å (i) skrive ned skyldig beløp, inkludert til null, eller konvertere Verdipapirene til andre verdipapirer, inkludert ordinære aksjer i den relevante institusjonen (eller et datterselskap) – det såkalte “bail-in”-verktøyet, (ii) overføring av hele eller deler av virksomheten til den relevante institusjonen til en “brobank”, overføring av svekkede eller problemrelaterte eiendeler til et kapitalforvaltningsselskap (asset management vehicle), og (iv) selge den relevante institusjonen til en kommersiell kjøper. I tillegg har avviklingsmyndigheten makt til å modifisere kontraktsfestede avtaler, utsette gjennomføring eller oppsigelsesrettigheter som ellers kan utløses. Avviklingsregimet er utformet slik at det utløses før konkurs, og innehavere av Verdipapirer kan kanskje ikke forutse iverksetting av eventuelle avviklingstiltak av avviklingsmyndigheten. Videre vil innehavere av Verdipapirer ha svært begrensede rettigheter til å utfordre en eventuell utøvelse av slike tiltak fra avviklingsmyndighetens side, selv om slike tiltak har ført til nedskrivning av Verdipapirene eller en konvertering av Verdipapirene til egenkapital.

Kupongbeløp: på en Kupongobservasjonsdato:

- Dersom Referansekursen på hver Underliggende Eiendel er større enn eller lik deres respektive Kupongbarrierenivå, vil et Kupongbeløp i NOK, med hensyn til hvert Verdipapir, betales på følgende Kupongbetalingsdato, beregnet i henhold til følgende formel:

$$(CA \times CV) - APCA, \text{ eller}$$

- Dersom Referansekursen på en Underliggende Eiendel er lavere enn dennes Kupongbarrierenivå, vil det ikke betales et Kupongbeløp på den påfølgende Kupongbetalingsdatoen.

Autocall-hendelsesbeløp: på en Autocall-observasjonsdato, dersom Referansekursen på en Underliggende Eiendel er større enn eller lik dens respektive Autocall-nivå, skal Verdipapirene løses inn tidlig på slik Autocall-observasjonsdato, og Autocall-hendelsesbeløpet som skal betales for hvert Verdipapir på følgende Autocall-betalingsdato vil tilsvare NOK 10.000.

Oppgjørsbeløp: om ikke verdipapiret allerede er utøvd tidlig, eller kjøpt eller kansellert, vil Oppgjørsbeløpet i NOK som skal betales med hensyn til hvert Verdipapir på Forfallsdatoen være:

- dersom Endelig Sluttkurs på hver Underliggende Eiendel er større enn eller lik deres respektive Barrierenivå, et beløp tilsvarende NOK 10.000, eller
- dersom Endelig Sluttkurs på en Underliggende Eiendel er lavere enn dennes Barrierenivå, et beløp som beregnes i henhold til følgende formel:

$$CA \times \frac{\text{Final Reference Value}}{\text{Initial Reference Value}}$$

Ikke-planlagt førtidig tilbakebetalingsbeløp: Verdipapirene kan innløses før planlagt forfall: (i) etter Utsteders valg (a) dersom Utstederen bestemmer at en endring i gjeldende lover har den virkning at resultatene til Utstederen eller dens datterselskaper i forbindelse med Verdipapirene eller kurssikringstransaksjoner knyttet til Verdipapirene, har blitt (eller det er en betydelig sannsynlighet for at de i nærmeste fremtid vil bli) ulovlige eller ugjennomførbare (helt eller delvis), (b) når det er aktuelt, dersom Beregningsagenten bestemmer at visse ytterligere avbruddshendelser eller justeringshendelser som fastsatt i vilkårene for Verdipapirene, har inntruffet for de underliggende eiendelene, eller (ii) ved at en Innehaver varsler om at slike Verdipapirer skal tilbakebetales umiddelbart på grunn av at det har forekommet mislighold som vedvarer.

I slike tilfeller skal det Ikke-planlagte førtidige tilbakebetalingsbeløpet som skal betales ved en slik førtidig innløsning, for hvert Verdipapir, være et beløp som representerer virkelig markedsverdi på Verdipapiret når man tar hensyn til alle relevante faktorer med fradrag for alle kostnader som Utstederen eller dens datterselskaper har pådratt seg i forbindelse med slik førtidig innløsning, inkludert de som er knyttet til avvikling av eventuelle underliggende og/eller tilhørende kurssikringsordninger. *Det Ikke-planlagte førtidige tilbakebetalingsbeløpet kan være mindre enn den opprinnelige investeringen, og du kan derfor tape noe av eller hele investeringen ved en ikke-planlagt førtidig innløsning.*

<p>Hva er de viktigste risikofaktorene knyttet til Verdipapirene?</p>
<p>Risikofaktorer forbundet med Verdipapirene: Verdipapirene er gjenstand for følgende viktige risikofaktorer:</p> <p>Verdien og kursen som oppgis på Verdipapirene dine (om noen) til enhver tid vil reflektere mange faktorer og kan ikke forutsies. Avhengig av utviklingen i de Underliggende Eiendelene kan du tape noe av eller hele investeringen din.</p> <p>Risikofaktorer knyttet til visse egenskaper ved Verdipapirene:</p> <ul style="list-style-type: none"> • Vilkårene for Verdipapirene dine angir at Verdipapirene er gjenstand for en øvre grense (cap). Derfor vil din evne til

å ta del i en endring i verdien på de Underliggende Eiendelene i løpet av Verdipapirperioden være begrenset, uavhengig av hvor mye kursen på en Underliggende Eiendel øker utover den øvre grensen over Verdipapirens løpetid. Tilsvarende vil avkastningen på Verdipapirene dine bli vesentlig lavere enn om du hadde kjøpt de Underliggende Eiendelene direkte.

- Vilkårene for Verdipapirene dine angir at avkastningen på Verdipapirene avhenger av "dårligst av"-utvikling i kurven av Underliggende Eiendeler. Derfor vil du bli eksponert for utviklingen i hver Underliggende Eiendel, og spesielt for den Underliggende Eiendelen som har dårligst utvikling. Dette betyr, uavhengig av hvordan utviklingen i den andre Underliggende Eiendelen er, at dersom en Underliggende Eiendel ikke når en relevant terskel eller barriere for beregning av et eventuelt oppgjørsbeløp, kan det være at du ikke mottar noen rentebetaling og/eller du kan tape noe av eller hele den opprinnelige investeringen din.

Risiko knyttet til de Underliggende Eiendelene:

- *Verdien og avkastningen på Verdipapirene dine avhenger av utviklingen i de Underliggende Eiendelene.*

Avkastningen på Verdipapirene dine avhenger av utviklingen i en eller flere Underliggende Eiendeler. Kursen på en Underliggende Eiendel kan være gjenstand for uforutsigbare endringer over tid. Graden av endring er kjent som "volatilitet". Volatiliteten til en Underliggende Eiendel kan påvirkes av nasjonale og internasjonale finans-, politiske, militære eller økonomiske hendelser, inkludert tiltak fra myndighetene, eller av aktivitetene til aktører i relevante markeder. Enhver slik hendelse eller aktivitet kan ha negativ effekt på verdien og avkastningen på Verdipapirene. Volatilitet antyder ikke kursen av en Underliggende Eiendel, selv om en Underliggende Eiendel som er mer volatil trolig vil øke eller gå ned i verdi oftere og/eller i større grad enn en som er mindre volatil.

- *Tidligere utvikling i en Underliggende Eiendel er ikke en indikasjon på fremtidige resultater.*

Du bør ikke se på informasjon om tidligere utvikling for de Underliggende Eiendelene som en indikasjon på variasjonsbredde på, eller trender i, fluktuasjonene i de Underliggende Eiendelene som kan inntreffe i framtiden. Underliggende Eiendeler kan utvikle seg annerledes enn (eller likt som) tidligere, og dette kan ha vesentlig negativ effekt på verdien og avkastningen på Verdipapirene dine.

- Aksjenes utvikling avhenger av makroøkonomiske faktorer som rente og prisnivå i kapitalmarkedene, valutakursutvikling, politiske faktorer og egne selskapsfaktorer slik som inntjening, markedsposisjon, risikosituasjon, aksjonærstruktur og utdelingspolitikk, i tillegg til forretningsrisiko som utstederne av disse står overfor. Enhver kombinasjon av slike faktorer kan ha negativ innvirkning på utviklingen i de Underliggende Eiendelene, som i sin tur kan ha negativ innvirkning på verdien og avkastningen på Verdipapirene dine.

Vilka nyckelrisker är specifika för Emittenten?

Emittenten är föremål för följande nyckelrisker:

- Betalningen av varje belopp som förfaller under Värdepapperen är utsatt för kreditrisken förknippad med Emittenten. Värdepapperen är Emittentens icke säkerställda förpliktelser. Investerare är beroende av Emittentens förmåga att betala alla belopp som förfallit till betalning under Värdepapperen, och därför är investerare föremål för Emittentens kreditrisk och för förändringar i marknadens syn på Emittentens kreditvärdighet. Värdepapperen är inte banksäkringar och dessa är inte försäkrade eller garanterade av eller någon insättningsgaranti. Värdet för och avkastningen från Värdepapperen kommer att vara utsatt för Emittentens kreditrisk och för förändringar i marknadens syn på Emittentens kreditvärdighet.

¹ "Arvoden och provisioner" inkluderas under "icke-ränterelaterade intäkter" och inkluderas därför inte som en enskild post.

² "Efterställda lån" inkluderas under "total icke-säkerställd upplåning" och inkluderas därför inte som en enskild post.

- GSG och dess konsoliderade dotterföretag ("**Goldman Sachs**") är en ledande global investmentbank, värdepappers- och investeringsförvaltningskoncern och står inför en rad betydande risker som kan påverka Emittentens förmåga att uppfylla sina skyldigheter enligt Värdepapperen, inklusive marknads- och kreditrisker, likviditetsrisker, affärsaktivitets- och branschrisker, operativa risker och legala, regulatoriska och renommérisker.
- GSI är ett helägt dotterföretag till Goldman Sachs-koncernen och ett viktigt bankdotterföretag till Goldman Sachs-koncernen. Som ett resultat är det föremål för olika risker som är väsentliga och inneboende i dess verksamheter inklusive risker relaterade till ekonomiska och marknadsmässiga förhållanden, reglering, Brexit, marknadsvolatilitet, likviditet, kreditmarknader, koncentration av risk, kreditkvalitet, kundbasens sammansättning, derivattransaktioner, operationell infrastruktur, cybersäkerhet, riskhantering, affärsinitiativ, verksamhet i flera jurisdiktioner, intressekonflikter, konkurrens, förändringar i underliggande, personal, negativ publicitet, juridiskt ansvar, katastrofala händelser och klimatförändringar.
- GSI omfattas av direktivet om återhämtning och resolution av banker, som är avsett att möjliggöra en rad åtgärder tas av en resolutionsmyndighet i förhållande till kreditinstitut och värdepappersföretag som en resolutionsmyndighet bedömer att riskerar att falla och där sådana åtgärder är nödvändiga i allmänhetens intresse. De resolutionsbefogenheter som finns tillgängliga för resolutionsmyndigheten inkluderar befogenheter att (i) skriva ner det skyldiga beloppet, inklusive till noll, eller konvertera Värdepapperen till andra värdepapper, inklusive vanliga aktier i den relevanta institutionen (eller ett dotterföretag) - det så kallade "räddnings"-verktyget; (ii) överföra hela eller delar av verksamheten för det relevanta institution till ett "broinstitut"; (iii) överföra nedskrivna eller problemtillgångar till ett tillgångsförvaltningsverktyg; och (iv) sälja den berörda institutionen till en kommersiell köpare. Dessutom har resolutionsmyndigheten befogenhet att ändra avtalsarrangemang, avbryta verkställighets- eller uppsägningsrättigheter som annars skulle kunna utlösas. Resolutionsregimen är utformad för att utlösas före insolvens, och innehavare av Värdepapper kanske inte kan förutse att resolutionsmyndigheten utövar resolutionsmakten. Vidare skulle innehavare av Värdepapper ha mycket begränsade rättigheter att utmana utövandet av befogenheter av resolutionsmyndigheten, även om sådana befogenheter har resulterat i nedskrivning av Värdepapperen eller omvandling av Värdepapperen till eget kapital.
