9. **UNITED STATES TAX CONSIDERATIONS**

Section 871(m) Withholding Tax

The U.S. Treasury Department has issued regulations under which amounts paid or deemed paid on certain financial instruments that are treated as attributable to U.S.-source dividends could be treated, in whole or in part depending on the circumstances, as a "dividend equivalent" payment that is subject to tax at a rate of 30 per cent. (or a lower rate under an applicable treaty). We have determined that, as of the issue date of the Certificates, the Certificates will not be subject to withholding under these rules. In certain limited circumstances, however, it is possible for United States alien holders to be liable for tax under these rules with respect to a combination of transactions treated as having been entered into in connection with each other even when no withholding is required. United States alien holders should consult their tax advisor concerning these regulations, subsequent official guidance and regarding any other possible alternative characterisations of their Certificates for United States federal income tax purposes. See "*United States Tax Considerations – Dividend Equivalent Payments*" in the Base Prospectus for a more comprehensive discussion of the application of Section 871(m) to the Certificates.

EXAMPLES

THE EXAMPLES PRESENTED BELOW ARE FOR ILLUSTRATIVE PURPOSES ONLY.

For the purposes of each Example:

- (i) the Issue Price is 100 per cent. (100%) of the Aggregate Nominal Amount and the Calculation Amount is SEK 10,000;
- (ii) the Coupon Barrier Level, in respect of each Underlying Asset, an amount equal to 80 per cent (80%) of the Asset Initial Price of such Underlying Asset;
- (iii) the Autocall Level is, in respect of each Underlying Asset, an amount equal to 90 per cent (90%) of the Asset Initial Price of such Underlying Asset; and
- (iv) the Barrier Level is, in respect of each Underlying Asset, an amount equal to 60 per cent (60%) of the Asset Initial Price of such Underlying Asset.

For the purposes of these Examples only, the Coupon Value Multiplicand is deemed to be 0.0135. The actual Coupon Value Multiplicand will be determined by the Calculation Agent on or around June 1, 2022 and may be a lesser or greater amount than 0.0135 (but shall not be less than 0.0115). Therefore, as the actual Coupon Value Multiplicand may be lower than the deemed value used for the purposes of these Examples, the actual amounts received by investors may be less than the amounts stated in the Examples.

AUTOMATIC EARLY EXERCISE

Example 1 – Automatic Early Exercise and Coupon Amount: *The Reference Price of each Underlying Asset for the Valuation Date scheduled to fall on December 1, 2023 is greater than or equal to its respective Autocall Level. The Coupon Value Multiplier corresponding to such Coupon Observation Date is 18.*

In this Example, the Certificates will be automatically exercised on such Valuation Date, and the Automatic Early Exercise Amount payable per Certificate (of the Calculation Amount) on the Automatic Early Exercise Date immediately following such Valuation Date will be an amount in the Settlement Currency equal to the Autocall Event Amount, i.e., SEK 10,000. Additionally, a Coupon Amount per Certificate (of the Calculation Amount) will be payable on the Coupon Payment Date falling on such Automatic Early Exercise Date, and such Coupon Amount will be an amount in the Settlement Currency equal to the *difference* between (i) the *product* of (a) the Calculation Amount, *multiplied* by (b) 0.243 *minus* (ii) the *aggregate* of the Coupon Amounts (if any) per Certificate (of the Calculation Amount) previously paid on the Coupon Payment Dates preceding such Valuation Date.

Example 2 – no Automatic Early Exercise but Coupon Amount: *The Reference Price of one Underlying Asset for the Valuation Date scheduled to fall on December 1, 2023 is less than its Autocall Level for such Valuation Date but greater than or equal to its Coupon Barrier Level for such Valuation Date, and the Reference Price of each other Underlying Asset for such Valuation Date is greater than or equal to its Autocall Level for such Valuation Date. The Coupon Value Multiplier corresponding to such Coupon Observation Date is 18.*

In this Example, the Certificates will not be automatically exercised on such Valuation Date, and no Automatic Early Exercise Amount will be payable per Certificate (of the Calculation Amount) on the Automatic Early Exercise Date immediately following such Valuation Date. A Coupon Amount per Certificate (of the Calculation Amount) will be payable on the Coupon Payment Date immediately following such Valuation Date, and such Coupon Amount will be an amount in the Settlement Currency equal to the *difference* between (i) the *product* of (a) the Calculation Amount, *multiplied* by (b) 0.243, *minus* (ii) the *aggregate* of the Coupon Amounts (if any) per Certificate (of the Calculation Amount) previously paid on the Coupon Payment Dates preceding such Valuation

Date.

Example 3 – no Automatic Early Exercise and no Coupon Amount: *The Reference Price of one Underlying Asset for the Valuation Date scheduled to fall on December 1, 2023 is less than its Coupon Barrier Level for such Valuation Date, and the Reference Price of each other Underlying Asset for such Valuation Date is greater than or equal to its Coupon Barrier Level for such Valuation Date.*

In this Example, the Certificates will not be automatically exercised on such Valuation Date, and no Automatic Early Exercise Amount will be payable per Certificate (of the Calculation Amount) on the Automatic Early Exercise Date immediately following such Valuation Date. No Coupon Amount will be payable on the Coupon Payment Date immediately following such Valuation Date.

SETTLEMENT AMOUNT

Example 4 – neutral scenario and Coupon Amount: *The Certificates have not been exercised on an Applicable Date, and the Final Closing Price of each Underlying Asset is 80 per cent. (80%) or more of its respective Asset Initial Price. The Coupon Value Multiplier corresponding to such Coupon Observation Date is 60.*

In this Example, the Certificates will be automatically exercised on the Final Reference Date and the Settlement Amount payable per Certificate (of the Calculation Amount) on the Maturity Date will be an amount in the Settlement Currency equal to the *product* of (i) the Calculation Amount, *multiplied* by (ii) the Redemption Percentage, i.e., SEK 10,000. Additionally, a Coupon Amount per Certificate (of the Calculation Amount) will be payable on the Coupon Payment Date falling on the Maturity Date, and such Coupon Amount will be an amount in the Settlement Currency equal to the *difference* between (i) the *product* of (a) the Calculation Amount, *multiplied* by (b) 0.81, *minus* (ii) the *aggregate* of the Coupon Amounts (if any) per Certificate (of the Calculation Amount) previously paid on the Coupon Payment Dates preceding the Final Reference Date.

Example 5 – neutral scenario and no Coupon Amount: *The Certificates have not been automatically exercised on an Applicable Date, and the Final Closing Price of each Underlying Asset is 60 per cent. (60%) or more of its respective Asset Initial Price and the Final Closing Price of at least one Underlying Asset is less than 80 per cent. (80%) of its Asset Initial Price.*

In this Example, the Certificates will be automatically exercised on the Final Reference Date and the Settlement Amount payable per Certificate (of the Calculation Amount) on the Maturity Date will be an amount in the Settlement Currency equal to the *product* of (i) the Calculation Amount, *multiplied* by (ii) the Redemption Percentage, i.e., SEK 10,000. No Coupon Amount will be payable on the Coupon Payment Date falling on the Maturity Date.

Example 6 – negative scenario and no Coupon Amount: *The Certificates have not been automatically exercised on an Applicable Date, the Final Closing Price of one Underlying Asset is 59 per cent. (59%) of its Asset Initial Price and the Final Closing Price of each other Underlying Asset is 60 per cent. (60%) or more of its respective Asset Initial Price.*

In this Example, the Certificates will be automatically exercised on the Final Reference Date and the Settlement Amount payable per Certificate (of the Calculation Amount) on the Maturity Date will be an amount in the Settlement Currency equal to the *product* of (i) the Calculation Amount, *multiplied* by (ii) the *quotient* of (a) the Final Closing Price of the Final Worst Performing Asset, *divided* by (b) the Initial Value of the Final Worst Performing Asset, i.e., SEK 5,900. No Coupon Amount will be payable on the Coupon Payment Date falling on the Maturity Date. **In this Example, an investor who purchased the Certificates at the Issue Price will sustain a partial loss of the amount invested in the Certificates (apart from the Coupon Amounts received prior to the Maturity Date).**

Example 7 – negative scenario and no Coupon Amount: *The Certificates have not been automatically exercised on an Applicable Date, the Final Closing Price of one Underlying Asset is zero per cent. (0%) of its Asset Initial Price and the Final Closing Price of each other Underlying Asset is 60 per cent. (60%) or more of its respective Initial Closing Price.*

In this Example, the Certificates will be automatically exercised on the Final Reference Date and the Settlement Amount payable per Certificate (of the Calculation Amount) on the Maturity Date will be an amount in the Settlement Currency equal to the *product* of (i) the Calculation Amount, *multiplied* by (ii) the *quotient* of (a) the Final Closing Price of the Final Worst Performing Asset, *divided* by (b) the Initial Value of the Final Worst Performing Asset, i.e., zero. No Coupon Amount will be payable on the Coupon Payment Date falling on the Maturity Date. **In this Example, an investor will sustain a total loss of the amount invested in the Certificates (apart from the Coupon Amounts received prior to the Maturity Date).**

What are the key risks that are specific to the Issuer?

The Issuer is subject to the following key risks:

- The payment of any amount due on the Securities is subject to the credit risk of the Issuer. The Securities are the Issuer's unsecured obligations. Investors are dependent on the Issuer's ability to pay all amounts due on the Securities, and therefore investors are subject to the Issuer's credit risk and to changes in the market's view of the Issuer's creditworthiness. The Securities are not bank deposits, and they are not insured or guaranteed by any compensation or deposit protection scheme. The value of and return on the Securities will be subject to the Issuer's credit risk and to changes in the market's view of the Issuer's creditworthiness.
- GSG and its consolidated subsidiaries ("**Goldman Sachs**") is a leading global investment banking, securities and investment management group and faces a variety of significant risks which may affect the Issuer's ability to fulfil its obligations under the Securities, including market and credit risks, liquidity risks, business activities and industry risks, operational risks and legal, regulatory and reputational risks.
- GSI is a wholly-owned subsidiary of the Goldman Sachs group and a key banking subsidiary of the Goldman Sachs group. As a result, it is subject to a variety of risks that are substantial and inherent in its businesses including risks relating to economic and market conditions, regulation, Brexit, market volatility, liquidity, credit markets, concentration of risk, credit quality, composition of client base, derivative transactions, operational infrastructure, cyber security, risk management, business initiatives, operating in multiple jurisdictions, conflicts of interest, competition, changes in underliers, personnel, negative publicity, legal liability, catastrophic events and climate change.
- GSI is subject to the Bank Recovery and Resolution Directive, which is intended to enable a range of actions to be taken by a resolution authority in relation to credit institutions and investment firms considered by the resolution authority to be at risk of failing and where such action is necessary in the public interest. The resolution powers available to the resolution authority include powers to (i) write down the amount owing, including to zero, or convert the Securities into other securities, including ordinary shares of the relevant institution (or a subsidiary) – the so-called "bail-in" tool; (ii) transfer all or part of the business of the relevant institution to a "bridge bank"; (iii) transfer impaired or problem assets to an asset management vehicle; and (iv) sell the relevant institution to a commercial purchaser. In addition, the resolution authority is empowered to modify contractual arrangements, suspend enforcement or termination rights that might otherwise be triggered. The resolution regime is designed to be triggered prior to insolvency, and holders of Securities may not be able to anticipate the exercise of any resolution power by the resolution authority. Further, holders of Securities would have very limited rights to challenge the exercise of powers by the resolution authority, even where such powers have resulted in the write down of the Securities or conversion of the Securities to equity.

What are the key risks that are specific to the Securities?

Risk factors associated with the Securities: The Securities are subject to the following key risks:

The value and quoted price of your Securities (if any) at any time will reflect many factors and cannot be predicted. Depending on the performance of the Underlying Assets, you may lose some or all of your investment.

Risks relating to certain features of the Securities:

- The terms and conditions of your Securities provide that the Securities are subject to a cap. Therefore, your ability to participate in any change in the value of the Underlying Assets over the term of the Securities will be limited, no matter how much the price of an Underlying Asset may rise beyond the cap level over the life of the Securities. Accordingly, the return on your Securities may be significantly less than if you had purchased the Underlying Assets directly.
- The terms and conditions of your Securities provide that the return on the Securities depends on the "worst-of" performance of the basket of Underlying Assets. Therefore, you will be exposed to the performance of each Underlying Asset and, in particular, to the Underlying Asset which has the worst performance. This means that, irrespective of how the other Underlying Assets perform, if any one or more Underlying Assets fails to meet a relevant threshold or barrier for the payment of interest or the calculation of any redemption amount, you may receive no interest payments and/or could lose some or all of your initial investment.

Risks relating to the Underlying Assets:

- *The value of and return on your Securities depends on the performance of the Underlying Assets.* The return on your Securities depends on the performance of one or more Underlying Assets. The price of an Underlying Asset may be subject to unpredictable change over time. This degree of change is known as "volatility". The volatility of an Underlying Asset may be affected by national and international financial, political, military or economic events, including governmental actions, or by the activities of participants in the relevant markets. Any of these events or activities could adversely affect the value of and return on the Securities. Volatility does not imply direction of the price of an Underlying Asset, though an Underlying Asset that is more volatile is likely to increase or decrease in value more often and/or to a greater extent than one that is less volatile.
- *Past performance of an Underlying Asset is not indicative of future performance.* You should not regard any information about the past performance of the Underlying Assets as indicative of the range of, or trends in, fluctuations in the Underlying Assets that may occur in the future. Underlying Assets may perform differently (or the same) as in the past, and this could have material adverse effect on the value of and return on your Securities.
- The performance of Shares is dependent upon macroeconomic factors, such as interest and price levels on the capital markets, currency developments, political factors as well as company-specific factors such as earnings position, market position, risk situation, shareholder structure and distribution policy, as well as business risks faced by the issuers thereof. Any one or a combination of such factors could adversely affect the performance of the Underlying Assets which, in turn, would have a negative effect on the value of and return on your Securities.
