#### What are the key risks that are specific to the Issuer?

The Issuer is subject to the following key risks:

1. Liquidity risk arising from potential inability to borrow or access the capital markets on suitably favourable terms (including due to adverse changes in its credit ratings) or to sell its assets. This may also arise from increased liquidity costs. CS relies significantly on its deposit base for funding, which may not continue to be a stable source of funding over time.
2. Risks arising from the suspension and ongoing liquidation of certain supply chain finance funds and the failure of a US-based hedge fund to meet its margin commitments (and CS's exit from its positions relating thereto), in respect of which a number of regulatory and other inquiries, investigations and actions have been initiated or are being considered. In addition, there are risks arising from the impact of market fluctuations and volatility on CS's investment activities (against which its hedging strategies may not prove effective). The spread of COVID-19 and resulting government controls and containment measures implemented around the world have caused severe disruption to global supply chains, labour markets and economic activity, which have contributed to rising inflationary pressure and a spike in market volatility. The withdrawal of emergency monetary policies and liquidity support measures put in place by central banks during earlier stages of the COVID-19 pandemic may negatively affect economic growth and adversely affect CS's businesses, operations and financial performance. The spread of COVID-19 is continuing to have an adverse impact on the global economy, the severity and duration of which is difficult to predict. The COVID-19 pandemic has significantly impacted, and may continue to adversely affect, CS's credit loss estimates, mark-to-market losses, trading revenues, net interest income and potential goodwill assessments, and may also adversely affect CS's ability to successfully realise its strategic objectives and goals. CS is also exposed to other unfavourable economic, monetary, political, legal, regulatory and other developments in the countries in which it operates (as well as countries in which CS does not currently conduct business), including the escalating conflict between Russia and Ukraine, as a result of which the United States, European Union, United Kingdom and other countries have imposed, and may further impose, financial and economic sanctions and export controls targeting certain Russian entities and/or individuals (such that CS may face restrictions (including any Russian countermeasures) on engaging with certain consumer and/or institutional businesses), and which could lead to regional and/or global instability, as well as

adversely affect commodity and other financial markets or economic conditions. In addition, there are uncertainties regarding the discontinuation of benchmark rates. CS's significant positions in the real estate sector, and other large and concentrated positions, can also expose it to larger losses. Many of these market risk factors, including the impact of COVID-19, may increase other risks, including CS's credit risk exposures, which exist across a large variety of transactions and counterparties and in respect of which it may have inaccurate or incomplete information. These are exacerbated by adverse economic conditions and market volatility, including as a result of any defaults by large financial institutions (or any concerns relating thereto).

3. On 27 October 2022, CS announced a comprehensive new strategic direction and significant changes to its structure and organisation. CS's goals, its strategy for implementing them, and the completion of the announced measures are based on a number of key assumptions, including in relation to the future economic environment and the economic growth of certain geographic regions, the regulatory landscape, its ability to meet certain financial goals, and the confidence of clients, counterparties, employees and other stakeholders, including regulatory authorities, in this strategy and in CS's ability to implement it. If CS is unable to implement its strategy successfully in whole or in part, or should the strategic initiatives once implemented fail to produce the expected benefits, CS's financial results and its share price may be materially and adversely affected. CS's proposed goals may also increase its exposure to certain risks, including but not limited to credit risks, market risks, liquidity risks, operational risks and regulatory risks, and such risks may evolve in a way that is not under CS's control or entirely possible to predict. CS's strategy involves exiting certain businesses, and CS anticipates that revenues and income for the investment bank in particular will be materially reduced as a result. CS's ability to attract and retain clients, as well as its ability to hire and retain highly qualified employees, also may be adversely affected by these changes. CS anticipates that the implementation of its strategy may result in further impairments and write-downs, including in relation to goodwill and the revaluation of its deferred tax assets, which may have a material adverse effect on its results of operations and financial condition. In addition, implementing certain measures will entail the incurrence of significant restructuring expenses, including software and real estate impairments, estimated to be on the order of CHF 2.9 billion through the end of 2024, although they could exceed this level.
4. Country, regional and political risk in the regions in which CS has clients or counterparties, which may affect their ability to perform their obligations to CS. In part because an element of CS's strategy is to increase CS's wealth management businesses in emerging market countries, it may face increased exposure to economic, financial and political disruptions in those countries, which could result in significant losses. Related fluctuations in exchange rates for currencies (particularly for the US dollar) may also adversely affect CS.
5. A wide variety of operational risks arising from inadequate or failed internal processes, people, systems or from external events, including breaches of cyber-security and other failures of information technology. CS relies heavily on financial, accounting and other data processing systems, which are varied and complex, and may face additional technology risks due to the global nature of its operations. CS is thereby exposed to risks arising from human error, negligence, employee misconduct (including errors in judgement, fraud, malice, and/or engaging in violations of applicable laws, rules, policies or procedures), accidental technology failure, cyber-attack and information or security breaches. This also exposes CS to risk from non-compliance with existing policies or regulations. Protecting against threats to CS's cyber-security and data protection systems requires significant financial and human resources. Cybersecurity risks have also significantly increased in recent years in part due to the growing number and increasingly sophisticated activities of malicious cyber actors. The ongoing global COVID-19 pandemic has increased the vulnerability and likelihood of damage to CS's information technology systems as a result of a cybersecurity incident because of the wide-scale and prolonged shift to remote working for CS's employees and the increased reliance by CS's customers on remote (digital) banking services. CS's existing risk management procedures and policies may not be fully effective in mitigating its risk exposures in all economic market environments or against all types of risk, including risks that CS fails to identify, anticipate or mitigate, in whole or in part, which may result in unexpected, material losses. In addition, inadequacies or lapses in CS's risk management procedures, policies, tools, metrics and modelling can require significant resources and time to remediate, lead to non-compliance with laws, rules and regulations and attract heightened regulatory scrutiny, exposing CS to regulatory investigations or legal proceedings and subjecting it to litigation or regulatory fines, penalties or other sanctions, or capital surcharges or add-ons, as well as reputational damage. Moreover, CS's actual results may differ materially from its estimates and valuations, which are based upon judgement and available information and rely on predictive models and processes. The same is true of CS's accounting treatment of off-balance sheet entities, including special purpose entities, which requires it to exercise significant management judgement in applying accounting standards; these standards (and their interpretation) have changed and may continue to change. In addition, physical and transition climate risks could have a financial impact on CS either directly, through its physical assets, costs and operations, or indirectly, through its financial relationships with its clients. Given the growing volume of nascent climate and sustainability-related laws, rules and regulations, increasing demand from various stakeholders for environmentally sustainable products and services and regulatory scrutiny, CS may be subject to increasing litigation, enforcement and contract liability risks in connection with climate change, environmental degradation and other environmental social and governance related issues.
6. CS's exposure to legal risks is significant and difficult to predict and the volume and amount of damages claimed in litigation, regulatory proceedings and other adversarial proceedings against financial services firms continues to increase in many of the principal markets in which CS operates. CS's business is highly regulated, and existing, new or changed laws, rules and regulations (including in relation to sanctions) and monetary policy applicable to CS (as well as regulations and changes in enforcement practices applicable to its clients) may adversely affect its business and ability to execute its strategic plans and increase costs, as well as impact the demand from clients for CS's services. Moreover, CS's ability to attract and retain customers, clients, investors and employees, and conduct business transactions with its counterparties, could be adversely affected to the extent its reputation is damaged, which could arise from various sources, including if its procedures and controls fail (or appear to fail). In addition, Swiss resolution proceedings may affect CS's shareholders and creditors.

7. CS faces intense competition in all financial services markets, which has increased as a result of consolidation, as well as new and emerging technologies (including trends towards direct access to automated and electronic markets, robo-advising, digital assets and the move to more automated trading platforms). New technologies, such as cryptocurrency and blockchain, may disrupt the financial services industry and require CS to commit further resources to adapt its products and services. In this highly competitive environment, CS's performance is affected by its ability to recruit and retain highly skilled employees.

Similarly, prior to an insolvency of the Issuer, rights of the holders of the Securities may be adversely affected by the Swiss Financial Market Supervisory Authority FINMA's broad statutory powers in the case of a restructuring proceeding in relation to Credit Suisse, including its power to convert the Securities into equity and/or partially or fully write-down the Securities.</li> <li>2. <b>Potential loss of some or all of the investment.</b> If the amount payable on redemption of the Securities is less than the purchase price paid by investors for the Securities, investors may lose some of their investment. Following the occurrence of any such event, no other amounts on account of interest or otherwise shall be payable by the Issuer in respect of the Securities. Following the occurrence of any relevant event, the only amount payable in such circumstances shall be the unscheduled termination amount (which shall not be less than the specified minimum amount) and investors will not be able to participate in any potential upside performance of the underlying asset(s) after the occurrence of the relevant event.
4. **Risks in connection with discretionary rights of the calculation agent and related termination rights of the Issuer.** Upon the occurrence of an adjustment event or an extraordinary event, the Issuer or calculation agent has broad discretion to make certain modifications to the terms and conditions of the Securities to account for such event, without the consent of the Securityholders, including but not limited to, adjusting the calculation of the value of any underlying asset or any amount payable or other benefit to be received under the Securities, or substituting any underlying asset. Any such adjustment, postponement, alternative valuation or substitution could have a material adverse effect on the return on, and value of, the Securities and shall be made without the consent of the Securityholders.
5. **Risks associated with Securities linked to a basket of underlying assets.** Investors should note that the negative performance of a single basket constituent may outweigh a positive performance of one or more other basket constituents; a small basket, or an unequally weighted basket, will generally leave the basket more vulnerable to changes in the value of a heavily weighted basket constituent; and a change in composition of a basket pursuant to the terms of the Securities may have an adverse effect on basket performance. Where there is a high degree of correlation between the underlying assets in the basket, any risk that materialises in respect of one underlying asset also has an impact on the other underlying assets due to their correlation and investors may be exposed to greater risks of loss in case of adverse events or developments.
6. **Risks associated with equity indices, commodities and foreign exchange rates.** (a) The performance of an index is dependent upon macroeconomic factors which may adversely affect such performance and, in turn, the value of the Securities. An investment in the Securities is not the same as a direct investment in futures or option contracts on such index nor any or all of the components of such index and, in respect of price return indices, Securityholders will not have the benefit of any dividends paid by the components of such index. A change in the composition or discontinuance of an index could adversely affect the value of and return on the Securities. (b) Trading in commodities may be extremely volatile. Commodity prices are affected by a variety of factors that are unpredictable including, for example, changes in supply and demand relationships, weather patterns and extreme weather conditions, governmental programmes and policies, national and international political, military, terrorist and economic events, fiscal, monetary and exchange control programmes and changes in interest and exchange rates. Commodities markets may be subject to temporary distortions or other disruptions due to various factors, including lack of liquidity, the participation of entities who are neither end-users or producers and government regulation and intervention. The current or "spot" prices of physical commodities may also affect, in a volatile and inconsistent manner, the prices of futures contracts in respect of a commodity. (c) The performance of foreign exchange rates, currency units or units of account are dependent upon the supply and demand for currencies in the international foreign exchange markets, which are subject to economic factors, including inflation rates in the countries concerned, interest rate differences between the respective countries, economic forecasts, international political factors, currency convertibility and safety of making financial investments in the currency concerned, speculation and measures taken by governments and central banks. Such measures include, without limitation, imposition of regulatory controls or taxes, issuance of a new currency to replace an existing currency, alteration of the exchange rate or exchange characteristics by devaluation or revaluation of a currency or imposition of exchange controls with respect to the exchange or transfer of a specified currency that would affect exchange rates as well as the availability of a specified currency. Any such measures could have a negative impact on the market value of and return on the Securities.
7. **Risks in connection with the secondary market.** The secondary market for the Securities may be limited, may never develop at all or may not continue even though the Securities are listed, which may adversely impact the market value of such Securities or the ability of the investor thereof to sell such Securities. In addition, the market value of the Securities will be affected by factors beyond the control of the Issuer, such as the creditworthiness of the Issuer, the remaining time to maturity of the Securities, interest and yield rates, the value and volatility of the underlying asset(s), the occurrence of certain events in relation to the underlying asset(s) and national and international events.
8. **The effect of averaging.** Amount(s) payable on the Securities are based on the average of the values of the underlying asset(s) on specified averaging dates. The amount(s) payable may be significantly less than they would have been had such amount(s) been linked only to the value of the underlying asset(s) on the date on which the value was highest.

The offer of the Securities is not subject to an underwriting agreement on a firm commitment basis.

**Material conflicts pertaining to the issue/offer:**

Fees are payable to the Distributor(s). In making calculations and determinations with regard to the Securities, there may be a difference of interest between the Securityholders and the Issuer, the dealer, CSEB (either on its own or as an intermediary between the dealer and each Distributor) and their affiliated entities. In particular, the Issuer, the dealer, CSEB and their affiliated entities may have interests in other capacities (such as other business relationships and activities) and when acting in such other capacities may pursue actions and take steps that they deem necessary to protect their interests without regard to the consequences for any particular Securityholder, which may have a negative impact on the value of and return on the Securities. In the ordinary course of its business, the Issuer, the dealer, CSEB and/or any of their affiliates may effect transactions in relation to the underlying asset(s) and may enter into one or more hedging transactions with respect to the Securities. Such activities may affect the market price, liquidity, value of or return on the Securities and could be adverse to the interest of the relevant Securityholders.

#### Vilka nyckelrisker är specifika för Emittenten?

Emittenten är föremål för följande nyckelrisker:

1. Likviditetsrisk till följd av potentiell oförmåga att låna eller få tillgång till kapitalmarknaderna på lämpliga gynnsamma villkor (inklusive på grund av negativa värderingar i kreditvärdigheten) eller att sälja dess tillgångar. Detta kan också bero på ökade likviditetskostnader. CS förlitar sig väsentligt på sin insättningsbas för finansiering, som kanske inte fortsätter att vara en stabil finansieringskälla över tid.
2. Risker till följd av indragningen och den pågående avvecklingen av medel hänförliga till vissa leverantörskedjefinansieringar och en USA-baserad hedgefonds underlåtenhet att uppfylla sina marginalåtaganden (och CS:s avyttrande av sina innehav som är relaterade därtill), avseende vilka ett antal regulatoriska och andra förfrågningar, utredningar och åtgärder har inletts eller övervägs. Vidare uppstår risker från effekterna av marknadssvängningar och volatilitet på CS:s investeringsverksamhet (mot vilka dess hedgningsstrategier kanske inte visar sig vara effektiva). Spridningen av COVID-19 och de resulterande statliga kontrollerna och begränsningsåtgärderna implementerade världen över har förorsakat allvarliga störningar i globala försörjningsled, arbetsmarknader och ekonomiska aktiviteter som har bidragit till en ökad inflation och en höjd i marknadsvolatiliteten. Indragningen av akuta penningpolitik och likviditetsstödjande åtgärder som infördes av centralbanker under tidigare skeden av covid-19-pandemin kan påverka den ekonomiska tillväxten negativt och negativt påverka CS affärer, verksamhet och finansiella resultat. Spridningen av COVID-19 har en fortsatt negativ inverkan på den globala ekonomin, där dess svårighetsgrad och varaktighet är svår att förutse. Covid-19-pandemin har haft betydande effekter och kan fortsätta att inverka negativt på CS förväntade kreditförlustberäkningar, marknadsvärderingsförluster, handelsintäkter, nettoränteintäkter och potentiella bedömningar av goodwill-poster, och kan också negativt påverka CS förmåga att förverkliga sina strategiska målsättningar och mål. CS är också exponerad mot andra ogynnsamma ekonomiska, monetära, politiska, legala, regulatoriska och andra utvecklingar i de länder där det verkar (liksom länder där CS för närvarande inte bedriver verksamhet), inklusive den eskalerande konflikten mellan Ryssland och Ukraina, där USA, Europeiska unionen, Storbritannien och andra länder har som ett resultat därav har infört, och kan vidare införa finansiella och ekonomiska sanktioner och exportkontroller riktade mot vissa ryska enheter och/eller individer (så att CS kan möta restriktioner (inklusive ryska motåtgärder) för att engagera sig i vissa konsument- och/eller institutionella företag), och som kan leda till regional och/eller global instabilitet, samt negativt påverka råvaru- och andra

finansiella marknader eller ekonomiska förhållanden. Vidare finns dessutom osäkerhetsfaktorer avseende avveckling av referensräntor. CS:s betydande positioner inom fastighetssektorn, och andra stora och koncentrerade positioner, kan också utsätta det för större förluster. Många av dessa marknadsriskfaktorer, inklusive inverkan av COVID-19, kan öka andra risker, inklusive CS:s kreditriskexponering, som förekommer i och gentemot många olika transaktioner och motparter och för vilka det kan ha felaktig eller ofullständig information. Dessa förvärras av ogynnsamma ekonomiska förhållanden och marknadsvolatilitet, inklusive till följd av eventuella brister från stora finansiella institutioner (eller eventuella problem relaterade därmed).

3. Den 27 oktober 2022 tillkännagav CS en omfattande ny strategisk inriktning och betydande förändringar i sin struktur och organisation. CS mål, dess strategi för att genomföra dessa och slutförandet av de tillkännagivna åtgärderna baseras på ett antal viktiga antaganden, bland annat i förhållande till den framtida ekonomiska miljön och den ekonomiska tillväxten i vissa geografiska regioner, regleringslandskapet, dess förmåga att uppfylla vissa finansiella mål och förtroendet hos kunder, motparter, anställda och andra intressenter, inklusive tillsynsmyndigheter, i denna strategi och i CS:s förmåga att genomföra den. Om CS inte kan genomföra sin strategi framgångsrikt, helt eller delvis, eller om de strategiska initiativen, när de väl har genomförts, inte ger de förväntade fördelarna, kan CS finansiella resultat och aktiekurs påverkas väsentligt och negativt. CS föreslagna mål kan också öka dess exponering för vissa risker, inklusive men inte begränsat till kreditrisker, marknadsrisker, likviditetsrisker, operativa risker och regulatoriska risker, och sådana risker kan utvecklas på ett sätt som inte är under CS kontroll eller fullt möjligt att förutsäga. CS strategi innebär att man lämnar vissa verksamheter, och CS räknar med att intäkter och intäkter för investeringsbanken i synnerhet kommer att minska väsentligt som ett resultat. CS förmåga att attrahera och behålla kunder, liksom dess förmåga att anställa och behålla högkvalificerade medarbetare, kan också påverkas negativt av dessa förändringar. CS förväntar sig att genomförandet av dess strategi kan leda till ytterligare reserveringar och nedskrivningar, bland annat i förhållande till goodwill och omvärdering av uppskjutna skattefordringar, vilket kan ha en väsentlig negativ inverkan på dess resultat och finansiella ställning. Dessutom kommer genomförandet av vissa åtgärder att medföra betydande omstruktureringskostnader, inklusive reserveringar avseende programvara och fastigheter, som uppskattas vara i storleksordningen 2,9 miljarder CHF fram till slutet av 2024, även om de kan överstiga denna nivå.
4. Lands-, regional- och politisk risk i de regioner där CS har klienter eller motparter, vilket kan påverka deras förmåga att fullgöra sina skyldigheter gentemot CS. Delvis på grund av att ett led i CS:s strategi är att öka CS:s förmögenhetsförvaltningsverksamhet i tillväxtmarknadsländer, kan det möta ökad exponering för ekonomisk, finansiell och politisk instabilitet i dessa länder, vilket kan leda till betydande förluster. Relaterade fluktuationer i valutakurser för valutor (särskilt för den amerikanska dollarn) kan också påverka CS.
5. En mängd olika operativa risker till följd av otillräckliga eller misslyckade interna processer, personer eller system eller från externa händelser, inklusive cybersäkerhetsbrott och andra IT-störningar på. CS förlitar sig starkt på ekonomiska, redovisnings- och andra databehandlingssystem, som är varierande och komplexa, och kan möta ytterligare teknologirelaterade risker på grund av den globala karaktären i dess verksamheter. CS är därmed exponerad mot risker som uppstår till följd av mänskliga misstag, försumlighet, anställdas policybrott (inkluderat missbedömningar, bedrägerier och/eller andra brott mot tillämpliga lagar, regler, policys eller rutiner), oavsiktlig teknikfel, cyberattack och informations- eller säkerhetsbrott. Detta exponerar även CS för risker för bristande efterlevnad av befintlig policy eller regleringar. Skyddet av CS:s cybersäkerhet och dataskyddssystem kräver stora ekonomiska och mänskliga resurser. Cybersäkerhetsrisker har också väsentligen ökat de senaste åren delvis på grund av det växande antalet och ökade sofistikerade aktiviteter från bedrägliga cyberaktörer. Den pågående covid-19-pandemin har ökat sårbarheten och sannolikheten för skada på CS:s IT-system till följd av en cybersäkerhetsincident på grund av CS-anställdas storskaliga och förlängda övergång till distansarbete och CS-kundernas ökade användning av digitala banktjänster. CS:s befintliga riskhanteringsrutiner och policys kanske inte är till fullo effektiva för att minska dess riskexponeringar i alla ekonomiska marknadsmiljöer eller mot alla typer av risker, inklusive risker som CS misslyckas med att identifiera, förutse eller mildra, helt eller delvis, vilket kan leda till vid oväntade, materiella förluster. Dessutom kan brister eller brister i CS:s riskhanteringsrutiner, policys, verktyg, mätvärden och modellering kräva betydande resurser och tid att åtgärda, leda till bristande efterlevnad av lagar, regler och förordningar och locka till ökad regulatorisk granskning, vilket utsätter CS för regulatoriska utredningar eller rättsliga förfaranden och utsätta det för rättstvister eller böter, straff eller andra sanktioner, eller kapitaltillägg eller tillägg, såväl som skada på rykte. CS:s faktiska resultat skilja sig väsentligt från dess uppskattningar och värderingar som bygger på bedömning och tillgänglig information och förlitar sig på förutsägbara modeller och processer. Detsamma gäller för CS:s redovisningsbehandling av enheter utanför balansräkningen, inklusive enheter för särskilda ändamål, som kräver att det utövar betydande ledningsbedömning vid tillämpningen av redovisningsstandarder. Dessa standarder (och deras tolkning) har förändrats och kan fortsätta att förändras. Dessutom kan fysiska och klimatförändringsrisker inverka ekonomiskt på CS, antingen direkt genom dess fysiska tillgångar, kostnader och verksamhet eller indirekt genom dess ekonomiska relationer med kunderna. Med tanke på den växande volymen av begynnande klimat- och hållbarhetsrelaterade lagar, regler och förordningar, ökande efterfrågan från olika intressenter på miljömässigt hållbara produkter och tjänster och regulatorisk granskning, kan CS bli föremål

för ökande risker för rättstvister, verkställighet och kontraktsansvar i samband med klimatförändringar, miljöförstöring och andra miljörelaterade sociala frågor och förvaltningsfrågor.

6. CS:s exponering mot juridiska risker är betydande och svår att förutsäga och volymen och antalet skador som kan krävas i tvister, lagstiftningsförfaranden och andra motsättningar mot finansiella tjänsteföretag fortsätter att öka på många av de viktigaste marknaderna där CS är verksamt. CS:s verksamhet är starkt reglerad, och befintliga, nya eller ändrade lagar, regler och förordningar (inklusive med koppling till sanktioner) och penningpolitik som är tillämpliga för CS (såväl som förordningar och ändringar i tillämpningspraxis som gäller för sina kunder) kan påverka dess verksamhet och förmåga att genomföra sina strategiska planer och öka kostnaderna, samt påverka efterfrågan från kunder för CS tjänster. Dessutom kan CS:s förmåga att attrahera och behålla kunder, klienter, investerare och medarbetare och driva affärstransaktioner med dess motparter påverkas negativt genom att företagets anseende skadas, vilket kan härstamma från olika källor, inklusive avvikelser från interna procedurer och kontrollåtgärder. Schweiziska upplösningförfaranden kan påverka CS:s aktieägare och borgenärer.
7. CS möter intensiv konkurrens på alla marknader för finansiella tjänster, som har ökat till följd av konsolidering, liksom ny och framväxande teknologi (inklusive trender mot direkt tillgång till automatiserade och elektroniska marknader, robotrådgivning, digitala tillgångar och övergången till mer automatiserade handelsplattformar). Nya teknologier, så som kryptovaluta och blockkedjor, kan störa sektorn för finansiella tjänster och göra att CS behöver ägna ökade resurser till att anpassa sina produkter och tjänster. I en sådan konkurrensutsatt miljö påverkas CS:s resultat av dess förmåga att rekrytera och behålla högkvalificerade anställda.

#### Vilka nyckelrisker är specifika för Värdepapperen?

Värdepapperen är föremål för följande nyckelrisker:

1. **Risker i händelse av Emittentens insolvens eller resolutionsåtgärder:** En investering i Värdepapperen utgör icke-säkerställda skyldigheter för Emittenten och täcks inte av något lagstadgat eller annat insättningsgarantisystem och drar inte fördelen av någon garanti. I händelse av Emittentens insolvens kan därför en investerare i Värdepapperen förlora hela eller del av sin investering däri oavsett gynnsam utveckling av de andra värdebestämmande faktorerna, såsom utveckling för de(n) underliggande tillgången(arna). På liknande sätt, om, innan Emittentens insolvens, kan rättigheterna för innehavarna av Värdepapper påverkas negativt av den schweiziska tillsynsmyndigheten FINMA:s breda befogenheter i händelse av ett rekonstruktionsförfarande avseende Credit Suisse, inkluderat dess befogenhet att konvertera Värdepapperen till aktiekapital och/eller delvis eller till fullo skriva ned Värdepapperen.
2. **Potentiell förlust av delar av eller hela investeringen:** Om beloppet som ska betalas vid inlösen av Värdepapperen är lägre än den köpkurs som investerare betalade för Värdepapperen, kan investerare förlora en del av sin investering. Dessutom, om Värdepapper säljs på andrahandsmarknaden för mindre än den köpkurs som betalats av den relevanta investeraren, kan investerare förlora en del av eller hela sin investering.
3. **Risker i samband med inlösen av Värdepapperen till beloppet vid oplanerat avslutande:** Värdepapperen kan lösas in till beloppet vid oplanerat avslutande under vissa omständigheter, inkluderat: efter inträffandet av en uppsägningsgrundande händelse eller av olaglighetsskäl eller efter vissa händelser som påverkar Emittentens säkringsarrangemang och/eller de(n) underliggande tillgången(arna). Under sådana omständigheter är beloppet vid oplanerat avslutande troligtvis lägre än den ursprungliga köpkursen och kan vara så lågt som noll, och efter en sådan förtida inlösen kan investerare kanske inte återinvestera intäkterna i en investering med en jämförbar avkastning. Efter inträffandet av en relevant händelse ska det enda belopp som ska betalas under sådana omständigheter vara det oplanerade uppsägningsbeloppet (som inte ska vara lägre än det angivna minimibeloppet) och investerare kommer inte att kunna delta i någon potentiell uppåtgående utveckling av de(n) underliggande tillgången(arna) efter inträffandet av den relevanta händelsen.
4. **Risker i samband med beräkningsagentens diskretionära bestämmanderätt och därtill relaterade uppsägningsrättigheter för Emittenten:** Vid inträffandet av en justeringshändelse eller en extraordinär händelse, har Emittenten eller beräkningsagenten en bred diskretionär bestämmanderätt att göra vissa förändringar av villkoren för Värdepapperen för att beakta sådana händelser, utan Värdepappersinnehavarnas samtycke, inklusive, men inte begränsat till, att justera beräkningen av värdet för vilken som helst underliggande tillgång eller vilket som helst belopp som ska erläggas eller annan fördel som ska erhållas under Värdepapperen. Varje sådan justering, uppskjutande, alternativ värdering eller

ersättande kan ha en väsentlig negativ inverkan på avkastningen på och värdet på Värdepapperen och kommer att göras utan Värdepappersinnehavarnas samtycke.

5. **Risker förknippade med Värdepapper relaterade till en korg med underliggande tillgångar.** Investerare bör notera att den negativa utvecklingen för en enskild korgkomponent kan överväga en positiv utveckling för en eller flera andra korgkomponenter; en liten korg, eller en ojämnt viktad korg, kommer i allmänhet att göra korgen mer sårbar för förändringar i värdet av en tungt viktad korgkomponent; och en förändring i sammansättningen av en korg i enlighet med villkoren för Värdepapperen kan ha en negativ effekt på korgens utveckling. Där det finns en hög grad av korrelation mellan de underliggande tillgångarna i korgen, har varje risk som uppstår för en underliggande tillgång också en inverkan på de andra underliggande tillgångarna på grund av deras korrelation och investerare kan utsättas för större risker för förlust vid negativa händelser eller utveckling.
6. **Risker förknippade med aktieindex, råvaror och valutaväxlingskurser.** (a) Utvecklingen för ett index beror på makroekonomiska faktorer som negativt kan påverka värdet av Värdepapperen. En investering i Värdepapperen är inte detsamma som en direktinvestering i termins- eller optionskontrakt avseende sådant index, inte heller i någon eller alla av beståndsdelarna som inkluderas i sådant index och, avseende kursavkastningsindex (*price return*), Värdepappersinnehavare kommer inte dra fördel av någon utdelning som betalas i förhållande till komponenterna i sådant index. En förändring i sammansättningen eller ett upphörande av ett index kan negativt påverka värdet på och avkastningen från Värdepapperen. b) Handeln med råvaror kan vara extremt volatil. Råvarupriserna påverkas av en mängd olika faktorer som är oförutsägbara, till exempel förändringar i utbuds- och efterfrågeförhållanden, vädermönster och extrema väderförhållanden, statliga program och politik, nationella och internationella politiska, militära, terroristiska och ekonomiska händelser, finanspolitiska, monetära och valutakontrollprogram och förändringar i räntor och växelkurser. Råvarumarknaderna kan bli föremål för tillfälliga snedvridningar eller andra störningar på grund av olika faktorer, bland annat bristande likviditet, deltagande av enheter som varken är slutanvändare eller producenter samt statlig reglering och intervention. Aktuella priser eller "spotpriser" på fysiska råvaror kan också på ett volatilt och inkonsekvent sätt påverka priserna på terminskontrakt för en råvara. c) Utvecklingen av valutakurser, valutaenheter eller beräkningsenheter är beroende av tillgång och efterfrågan på valutor på de internationella valutamarknaderna, vilka är beroende av ekonomiska faktorer, inbegripet inflationstakten i de berörda länderna, räntedifferenser mellan respektive länder, ekonomiska prognoser, internationella politiska faktorer, valutakonvertibilitet och säkerhet vid finansiella investeringar i den berörda valutan. spekulation och åtgärder som vidtas av regeringar och centralbanker. Sådana åtgärder omfattar, utan begränsning, införande av regleringskontroller eller skatter, utfärdande av en ny valuta för att ersätta en befintlig valuta, ändring av växelkursen eller växelkursens egenskaper genom devalvering eller omvärdering av en valuta eller införande av valutakontroller med avseende på växling eller överföring av en viss valuta som skulle påverka växelkurserna samt tillgången till en viss valuta. Sådana åtgärder kan ha en negativ inverkan på marknadsvärdet på och avkastningen från Värdepapperen.
7. **Risker i samband med andrahandsmarknaden.** Andrahandsmarknaden för Värdepapperen kan vara begränsad, kanske inte uppstår över huvud taget eller kanske inte fortlöper trots att Värdepapperen tagits upp till handel, vilket negativt kan påverka marknadsvärdet på sådana Värdepapper eller investerarens förmåga att sälja sådana Värdepapper. Vidare kommer marknadsvärdet påverkas av faktorer utom Emittentens kontroll, såsom Emittentens kreditvärdighet, återstående tid till Värdepapperens förfallodag, ränte- och ränteavkastningssatser, värdet och volatiliteten på de(n) underliggande tillgången(arna), inträffandet av vissa händelser relaterade till de(n) underliggande tillgången(arna) och nationella och internationella händelser.
8. **Effekten av genomsnitt.** Belopp som ska erläggas för Värdepapperen baseras på genomsnittet av värdena på de(n) underliggande tillgången(arna) på angivna genomsnittsdagar. Belopp som ska erläggas kan vara betydligt mindre än vad de skulle ha varit om sådana belopp endast hade kopplats till värdet på de(n) underliggande tillgången(arna) på den dag då värdet var som högst.

När det gäller att göra beräkningar och fastställelser avseende Värdepapperen kan det finnas en skillnad i intresse mellan Värdepappersinnehavare och Emittenten, återförsäljaren, Credit Suisse Bank (Europe), S.A. ("**CSEB**") (antingen som sig själva eller som mellanhand mellan återförsäljaren och varje Distributör) och dessas närstående företag. Särskilt, kan Emittenten, återförsäljaren, CSEB och dessas närstående företag ha intressen i andra bemärkelser (såsom andra affärsrelationer och aktiviteter) och när det agerar i sådan kapacitet kan det sträva efter åtgärder och ta steg som de finner nödvändiga för att skydda sitt intresse utan hänsyn till konsekvenser för någon särskild Värdepappersinnehavare, vilket kan ha betydande negativ påverkan på värdet av och avkastningen på Värdepapperen. I den ordinarie verksamheten kan Emittenten, återförsäljaren, CSEB och/eller vilket som helst av dessas närstående företag genomföra transaktioner avseende de(n) underliggande tillgången(arna) och kan ingå en eller flera hedgningstransaktioner avseende Värdepapperen.
