B.3 What are the key risks that are specific to the Issuer?

- **Risk Relating to the Issuer and Guarantor**

Holders of Securities issued by the Issuer bear the credit risk of the relevant Issuer and/or the Guarantor, that is the risk that the relevant Issuer and/or the Guarantor is not able to meet its obligations under such Securities, irrespective of whether such Securities are referred to as capital or principal protected or how any principal, interest or other payments under Securities are to be calculated. If the Issuer and/or the Guarantor is not able to meet its obligations under the Securities, then that would have a significant negative impact on the investor's return on the Securities and an investor may lose up to its entire investment.

All material assets of MSBV are obligations of (or securities issued by) one or more Morgan Stanley Group companies. If any of these Morgan Stanley Group companies incurs losses with respect to any of its activities (irrespective of whether those activities relate to MSBV or not) the ability of such company to fulfil its obligations to MSBV could be impaired, thereby exposing holders of securities issued by MSBV to a risk of loss.

The following key risks affect Morgan Stanley and, since Morgan Stanley is the ultimate holding company of MSBV, also impact MSBV:

- **Risks relating to the financial situation of Morgan Stanley**

Morgan Stanley's results of operations may be materially affected by market fluctuations and by global financial market and economic conditions and other factors. Holding large and concentrated positions may expose Morgan Stanley to losses. These factors may result in losses for a position or portfolio owned by Morgan Stanley.

Morgan Stanley is exposed to the risk that third parties that are indebted to it will not perform their obligations, as well as that a default by a large financial institution could adversely affect financial markets. Such factors give rise to the risk of loss arising when a borrower, counterparty or issuer does not meet its financial obligations to Morgan Stanley.

Liquidity is essential to Morgan Stanley's businesses and Morgan Stanley relies on external sources to finance a significant portion of its operations. Morgan Stanley's borrowing costs and access to the debt capital markets depend on its credit ratings. Morgan Stanley is a holding company, has no operations and depends on dividends, distributions and other payments from its subsidiaries. Further, Morgan Stanley's liquidity and financial condition have in the past been, and in the future could be, adversely affected by U.S. and international markets and economic conditions. As a result of the foregoing, there is a risk that Morgan Stanley will be unable to finance its operations due to a loss of access to the capital markets or difficulty in liquidating its assets.

- **Risks relating to the operation of Morgan Stanley's business activities**

Morgan Stanley is subject to operational risks, including a failure, breach or other disruption of its operations or security systems or those of Morgan Stanley's third parties (or third parties thereof), as well as human error or malfeasance, which could adversely affect its businesses or reputation. A cyber-attack, information or security breach or a technology failure of Morgan Stanley's or of its third parties could adversely affect Morgan Stanley's ability to conduct its business, manage its exposure to risk or result in disclosure or misuse of confidential or proprietary information and otherwise adversely impact its results of operations, liquidity and financial condition, as well as cause reputational harm.

Morgan Stanley's risk management strategies, models and processes may not be fully effective in mitigating its risk exposures in all market environments or against all types of risk. Further, expected replacement of London Interbank Offered Rate and replacement or reform of other interest rate benchmarks could adversely affect Morgan Stanley's business, financial condition and results of operations.

- **Legal, Regulatory and Compliance Risk**

Morgan Stanley is subject to the risk of legal or regulatory sanctions, material financial loss including fines, penalties, judgments, damages and/or settlements, limitations on its business, or loss to reputation it may suffer as a result of its failure to comply with laws, regulations, rules, related self-regulatory organization standards and codes of conduct applicable to its business activities. Morgan Stanley is also subject to contractual and commercial risk, such as the risk that a counterparty's performance obligations will be unenforceable. Additionally, Morgan Stanley is subject to anti-money laundering, anti-corruption and terrorist financing rules and regulations.

- **Other risks relating to Morgan Stanley's business activities**

Morgan Stanley faces strong competition from financial services firms and others, which could lead to pricing pressures that could materially adversely affect its revenue and profitability. Further, automated trading markets may adversely affect Morgan Stanley's business and may increase competition.

Morgan Stanley is subject to numerous political, economic, legal, tax, operational, franchise and other risks as a result of its international operations (including risks of possible nationalization, expropriation, price controls, capital controls, exchange controls, increased taxes and levies, cybersecurity, data transfer and outsourcing restrictions, prohibitions on certain types of foreign and capital market activities, limitations on cross-border listings and other restrictive governmental actions, as well as the outbreak of hostilities or political and governmental instability, including tensions between China and the U.S.) which could adversely impact its businesses in many ways.

Morgan Stanley may be unable to fully capture the expected value from acquisitions, divestitures, joint ventures, partnerships, minority stakes or strategic alliances.

The application of regulatory requirements and strategies in the United States or other jurisdictions to facilitate the orderly resolution of large financial institutions may pose a greater risk of loss for Morgan Stanley's security holders and subject Morgan Stanley to other restrictions.

C.3.4 *Most material risk factors pertaining to the Guarantor*

The most material risk factors pertaining to Morgan Stanley are listed under section B.3 "What are the key risks that are specific to the Issuer?" above.

C.4 *What are the key risks that are specific to the Securities?*

- The Securities are not deposits or savings accounts and are not insured by the U.S. Federal deposit insurance corporation, the UK Financial Services Compensation Scheme, or any other governmental agency or instrumentality or deposit protection scheme anywhere, nor are they obligations of, or guaranteed by, a bank.
- The terms of the Securities differ from those of ordinary debt securities because the Securities, on maturity and depending on the performance of the Relevant Underlying, may return less than the amount initially invested or nothing.
- Unless otherwise stated in the terms and conditions applicable to the Securities, the securities issued by MSBV and MSFL will not have the benefit of any cross-default or cross-acceleration with other indebtedness of MSBV, MSFL or Morgan Stanley (as applicable). In addition, a covenant default by Morgan Stanley, as guarantor, or an event of bankruptcy, insolvency or reorganization of Morgan Stanley, as guarantor, does not constitute an event of default with respect to any securities issued by MSBV or MSFL.
- An Issuer may amend the terms and condition of the Securities, the Guarantee and the deed of covenant dated 17 July 2013 (as amended or supplemented from time to time) in relation to, amongst others, the Securities, without Securityholder consent if, in its opinion, such amendments are not materially prejudicial to Securityholders.
- It is impossible to predict how the level of the Relevant Underlying will vary over time. The historical performance value (if any) of the Relevant Underlying does not indicate the future performance of the Relevant Underlying. Factors such as volatility, interest rates, remaining term of the Securities or exchange rates will influence the price investors will receive if an investor sells its Securities prior to maturity.
- Indices are comprised of a synthetic portfolio of other assets, and its performance may be dependent on the performance of such assets. Returns on the Securities do not reflect a direct investment in underlying shares or other assets comprising the Relevant Underlying. A change in the composition or discontinuance of the Relevant Underlying could adversely affect the market value of the Securities.
- The market price of Securities may be very volatile. Further, investors in Securities may receive no payment of principal. The Relevant Underlying may be subject to significant fluctuations that may not correlate with changes in interest rates, currencies or other indices. The timing of changes in the Relevant Underlying may affect the actual yield to investors, even if the average level is consistent with their expectations. In general, the earlier the change in the Relevant Underlying the greater the effect on yield.
- Potential conflicts of interest may exist between the investor and the Determination Agent, who, under the terms of the Securities, may make such adjustments as it considers appropriate as a consequence of certain events affecting the Relevant Underlying, and in doing so, is entitled to exercise substantial discretion.

B.3 Vilka nyckelrisker är specifika för Emittenten?

Risker relaterade till Emittenten och Garanten

Innehavare av Värdepapper emitterade av Emittenten bär kreditrisken för den relevanta Emittenten och/eller Garanten, som är risken att den relevanta Emittenten och/eller Garanten inte kan uppfylla sina åtaganden enligt Värdepapperen, oavsett huruvida sådana Värdepapper är kapitalskyddade eller principalskyddade eller hur kapitalbelopp, räntebelopp eller andra betalningar enligt sådana Värdepapper ska beräknas. Om Emittenten och/eller Garanten inte kan uppfylla sina åtaganden enligt Värdepapperen, kommer det ha en betydande negativ påverkan på investerarens avkastning på Värdepapperen och en investerare kan förlora hela sin investering.

Samtliga betydande tillgångar för MSBV är åtaganden för (eller värdepapper emitterade av) ett eller flera företag inom Morgan Stanley-Koncernen. Om något av dessa företag inom Morgan Stanley-Koncernen drabbas av förluster avseende någon av dess verksamheter (oavsett om dessa verksamheter är relaterade till MSBV eller inte) kan förmågan hos sådant företag att fullgöra sina åtaganden gentemot MSBV, försämrats och därigenom exponera innehavare av värdepapper emitterade av MSBV mot risk för förlust.

De följande nyckelriskerna påverkar Morgan Stanley, och eftersom Morgan Stanley är det yttersta holdingmoderbolaget för MSBV, påverkar de även MSBV:

Risker relaterade till Morgan Stanleys finansiella ställning

Morgan Stanleys verksamhetsresultat kan väsentligen påverkas av marknadsfluktuationer och av globala finansiella marknader och ekonomiska händelser och andra faktorer. Att inneha stora och koncentrerade positioner exponerar Morgan Stanley för stora förluster. Dessa faktorer kan resultera i förluster för en position eller portfölj som ägs av Morgan Stanley.

Morgan Stanley är exponerat för risken att tredje parter som är skuldsatta till företaget inte kommer uppfylla sina åtaganden, såväl som att ett förfall av en stor finansiell institution negativt kan påverka finansiella marknader. Sådana faktorer ger upphov till risken för förlust som uppstår när en låntagare, motpart eller emittent inte uppfyller sina finansiella åtaganden gentemot Morgan Stanley.

Likviditet är essentiellt för Morgan Stanleys verksamhet och Morgan Stanley förlitar sig på externa källor för att finansiera en betydande del av sin verksamhet. Morgan Stanleys lånekostnader och tillgång till skuldkapitalmarknader är beroende av dess kreditbetyg. Morgan Stanley är ett holdingbolag, har ingen verksamhet och är beroende av dess utdelning, distribution och andra betalningar från dess dotterföretag. Vidare har Morgan Stanleys likviditet och finansiella ställning historiskt varit, och kan i framtiden vara, negativt påverkad av amerikanska och internationella marknader och ekonomiska händelser. Som en följd av det föregående, finns det en risk att Morgan Stanley kan vara oförmöget att finansiera sin verksamhet på grund av förlorad tillgång till kapitalmarknaderna eller svårigheter att avyttra sina tillgångar.

Risker relaterade till bedrivandet av Morgan Stanleys verksamhet

Morgan Stanley är föremål för operationella risker, inklusive misslyckande, avbrott eller annan störning av dess verksamhet eller säkerhetssystem eller de för Morgan Stanleys tredje parter (eller dess tredje parter), såväl som mänskliga misstag eller felaktigt agerande, vilket negativt kan påverka dess verksamhet eller rykte. En cyberattack, informations- eller säkerhetsavbrott eller teknisk störning hos Morgan Stanley eller någon av dess tredje parter, kan negativt påverka Morgan Stanleys förmåga att utöva sin verksamhet, hantera sin riskexponering eller resultera i avslöjande eller olaglig användning av konfidentiell eller proprietär information och i övrigt negativt påverka dess verksamhetsresultat, likviditet och finansiella ställning, såväl som orsaka en skada på dess rykte.

Morgan Stanleys riskhanteringsstrategier, modeller och processer kanske inte är till fullo effektiva vad avser lindring av dess riskexponering i alla marknadsmiljöer eller mot alla typer av risk. Vidare kan förväntat utbyte av London Interbank Offered Rate och utbyte eller reformering av andra räntereferensvärden negativt påverka Morgan Stanleys verksamhet, finansiella ställning och verksamhetsresultat.

Juridisk, regulatorisk och regelefterlevnadsrisk

Morgan Stanley är föremål för risker avseende juridiska eller regulatoriska sanktioner, betydande finansiella förluster inklusive böter, straff, domar, skadestånd och/eller förlikning, restriktioner för dess verksamhet, eller förlust av rykte som det kan lida som ett resultat av dess oförmåga att efterleva lagar, förordningar och regler, relaterade till självregleringsorganisationers standarder och uppförandekoder tillämpliga på dess verksamhet. Morgan Stanley är även föremål för kontraktuell och kommersiell risk, såsom risken att en motparts prestationsåtaganden inte kommer vara möjliga att verkställa. Vidare är Morgan Stanley föremål för regler och förordningar för att motverka penningtvätt, korruption och terroristfinansiering.

Andra risker relaterade till Morgan Stanleys verksamhet

Morgan Stanley möter stark konkurrens från företag som erbjuder finansiella tjänster och andra, vilket kan leda till prissättningspress som kan påverka dess avkastning och lönsamhet betydande negativt. Vidare kan automatiserade handelsplatser negativt påverka Morgan Stanleys verksamhet och kan öka konkurrensen.

Morgan Stanley är föremål för åtskilliga politiska, legala, skatterättsliga, franchise och andra risker som ett resultat av dess internationella verksamhet (inklusive risker avseende nationalisering, expropriation, priskontroller, kapitalkontroller, börskontroller, ökad beskattning och avgifter, cybersäkerhets-, dataöverförings- och outsourcingrestriktioner, förbud mot vissa typer av utländska och kapitalmarknadsaktiviteter, begränsningar för noteringar utomlands samt andra restriktiva myndighetsåtgärder, såväl som utbrott av fientlighet eller politiskt och myndighetsrelaterad instabilitet, inklusive spänningar mellan Kina och USA), vilka kan negativt påverka dess verksamhet på många sätt.

Morgan Stanley kan vara oförmöget att till fullo fänga det förväntade värdet från avyttringar, joint ventures, partnerskap, minoritetsposter eller strategiska allianser.

Tillämpligheten av regulatoriska krav och strategier i USA eller andra jurisdiktioner för att främja en ordnad upplösning av stora finansiella institutioner kan utgöra en större risk för förlust för Morgan Stanleys Värdepappersinnehavare och för Morgan Stanley för andra restriktioner.

C.3.4	De mest väsentliga riskfaktorerna som hänför sig till Garanten																							
De mest väsentliga riskfaktorerna som hänför sig till Morgan Stanley finns angivna i avsnitt B.3 "Vilka nyckelrisker är specifika för Emittenten?" ovan.																								

C.4	Vilka nyckelrisker är specifika för Värdepapperen?
<p>Värdepapperen är inte insättningar eller sparkonton och är inte försäkrade av vare sig det amerikanska bolaget för insättningsförsäkring (U.S. Federal deposit insurance corporation) UK Financial Services Compensation Scheme eller något annat regeringsorgan eller -funktion eller insättningsskyddsarrangemang någonstans. Värdepapperen utgör inte heller något åtagande för, och garanteras inte heller, av någon bank.</p> <p>Villkoren för vissa Obligationer kan skilja sig från de för vanliga skuldinstrument eftersom Obligationerna kanske inte betalar ränta och, vid förfallodagen, beroende på utvecklingen för den Relevanta Underliggande Tillgången, kan återbetala mindre än det investerade beloppet eller ingenting.</p> <p>Såvida inte annat anges i villkoren tillämpliga på Värdepapperen, kommer Värdepapperen emitterade av MSBV och MSFL inte att dra fördel av någon uppsägnings- eller accelerationsgrund hänförlig till acceleration eller uppsägning av annan skuldsättning för MSBV, MSFL eller Morgan Stanley (beroende på vad som är tillämpligt). Dessutom, en överträdelse av ett villkorsåtagande av Morgan Stanley, som garant, eller inträffandet av konkurs, insolvens eller rekonstruktion av Morgan Stanley, som garant, utgör inte en uppsägningsgrund avseende något värdepapper emitterat av MSBV eller MSFL.</p> <p>En Emittent kan justera villkoren för Obligationerna, Garantin och deed of covenant daterad den 17 juli 2013 (så som justerad eller förändrad från en tid till en annan) avseende, bl.a., Obligationerna utan Obligationssinnehavarens samtycke om, enligt dess uppfattning, sådana justeringar som inte är betydande till nackdel för Obligationssinnehavare.</p> <p>Det är omöjligt att förutsäga hur nivån på den Relevanta Underliggande Tillgången kommer att variera över tid. Det historiska utvecklingsvärdet (om det finns någon) för den Relevanta Underliggande Tillgången indikerar inte det framtida resultatet för den Relevanta Underliggande Tillgången. Faktorer som volatilitet, räntesatser, återstående löptid för Värdepapperen eller valutakurser kommer att påverka priset som investerarna får om en investerare säljer sina Värdepapper före förfallodagen.</p> <p>Index består av en syntetisk portfölj med andra tillgångar, och dess utveckling kan vara beroende av utvecklingen för sådana tillgångar. Avkastning på Värdepapperen speglar inte en direktinvestering i underliggande aktier eller andra tillgångar som ingår i index. En förändring av sammansättningen av index eller nedläggande av ett index kan negativt påverka marknadsvärdet på Värdepapperen.</p> <p>Värdepapperen marknadskurs kan vara mycket volatil. Vidare kan investerare i Värdepapperen få ingen betalning av kapital. Den Relevanta Underliggande Tillgången kan vara föremål för betydande fluktuationer som kanske inte korrelerar med förändringar i räntesatser, valutor eller andra index. Tidpunkten för förändringar i den Relevanta Underliggande Tillgången kan påverka den faktiska avkastningen till investerare, även om den genomsnittliga nivån överensstämmer med deras förväntningar. Generellt sett, desto större förändring i Relevant Underliggande Tillgång desto större är effekten på avkastningen.</p> <p>Potentiella intressekonflikter kan finnas mellan investeraren och Fastställelseagenten, vilken, under Obligationernas löptid, kan göra sådana justeringar som den finner passande som en konsekvens av vissa händelser som påverkar den Relevanta Underliggande Tillgången, och genom att göra så, har rätt att utöva betydande gottfinnande.</p>
