| What are the key risks that are specific to the Issuer? | | | | |
| Credit risk in relation to UBS AG as Issuer Each investor in securities issued by UBS AG as Issuer is exposed to the credit risk of UBS AG. The assessment of UBS AG's creditworthiness may be affected by a number of factors and developments. These include UBS Group AG's acquisition of Credit Suisse Group AG and the integration of the groups, UBS's reputation, operational risks, risk management and control processes, market conditions and macroeconomic climate, credit risk exposure to clients and counterparties, material legal and regulatory risks, substantial changes in regulation, UBS AG's success in executing its strategic plans, and liquidity and funding management. If UBS experiences financial difficulties, FINMA has the power to open restructuring or liquidation proceedings or impose protective measures in relation to UBS Group AG, UBS AG, UBS Switzerland AG or Credit Suisse (Schweiz) AG, and such proceedings or measures may have a material adverse effect on UBS AG's creditors. If restructuring or liquidation proceedings are instituted against UBS AG, holders of securities may suffer a substantial or total loss on the securities. | | | | |

| Section C – Key Information on the Securities |
|---|
| What are the main features of the Securities? |
| Type and form of the Securities The Securities are certificates with no capital protection. The Securities are issued in the form of securities in uncertificated and dematerialised book-entry form under Swedish law. The contents (other than the form) of the Securities as well as all rights and duties arising from the Securities are governed by German law. Rights attached to the Securities; payment profile at scheduled maturity The Securities provide Securityholders at maturity with a claim for payment of the Redemption Amount in the Redemption Currency. In particular, the Redemption Amount, if any, to be received by the Securityholder at maturity of the Securities depends on the performance of the Underlyings and whether or not a Kick In Event has occurred. A " Kick In Event " shall have occurred, if the Settlement Price of at least one Underlying _(k) is lower than the respective Kick In Level _(k) . If the Securities do not expire early, on the relevant Maturity Date, Securityholders are entitled to receive payment of the " Redemption Amount " determined as of the relevant Valuation Date as follows: |

- (a) If a Kick In Event has not occurred and if the Settlement Price of all Underlyings_(k) is at or above the respective Redemption Level_(k), the Securityholder is entitled to receive the sum of the Calculation Amount and the Final Additional Amount.
- (b) If a Kick In Event has not occurred and if the Settlement Price of at least one Underlying_(k) is below the respective Redemption Level_(k), the Securityholder is entitled to receive the Calculation Amount.
- (c) If a Kick In Event has occurred, the Securityholder is entitled to receive the Calculation Amount multiplied by the Settlement Price_(k) of the Underlying_(k) with the lowest performance divided by the Strike_(k) of such Underlying_(k).

Early Redemption

In case that the official closing price of all Underlyings_(k) as determined by the respective Price Source_(k) on the respective Early Redemption Observation Date is equal to or higher than the respective Early Redemption Level_(k) (such event constitutes an **"Early Redemption Event"**), the Securities will expire early on the respective Early Redemption Observation Date, and the Securityholder is entitled to receive the Early Redemption Amount on the relevant Maturity Date in the Redemption Currency. Securityholders will not be entitled to any further payments thereafter.

Coupon

Securityholders are entitled to receive payment of the Coupon Amount in the Redemption Currency on the Coupon Payment Date, conditional, however, upon the performance of the Underlyings.

If, on the Coupon Observation Date, either the Price of at least one Underlying_(k) is lower than the respective Coupon Default Level_(k), or the Price of all Underlyings_(k) is equal to or higher than the respective Redemption Level_(k), Securityholders will not receive payment of the Coupon Amount on the Coupon Payment Date (such event constitutes a **"Coupon Amount Default Event"**).

The Issuer is entitled to terminate the Securities with immediate effect if an (extraordinary) termination event occurs. Examples of (extraordinary) termination events include the discontinuation of the determination/publication of the Price of an Underlying or the occurrence of a change in law. In such case, the payable termination amount payable to Securityholders may be significantly lower than the capital invested by Securityholders for purchasing the Securities (including the transaction costs).

Relative seniority of the Securities in the Issuer's capital structure in the event of insolvency

The Securities constitute direct, unsecured and unsubordinated obligations of the Issuer, ranking pari passu among themselves and with all other present and future unsecured and unsubordinated obligations of the Issuer, other than obligations preferred by mandatory provisions of law.

Restrictions on the free transferability of the Securities

The Securities are freely transferable.

Where will the Securities be traded?

It is intended that application for listing of the Securities on the regulated market of Nasdaq Stockholm will be made.

What are the key risks that are specific to the Securities?

The Securityholders are exposed to the risk of a bail-in. In case FINMA as supervisory authority in respect of the Issuer exercises resolution measures against the Issuer and writes down or converts the Securities into common equity of the Issuer, Securityholders would have no further claim against the Issuer under the Securities.

The Securities are not protected by any statutory or voluntary deposit guarantee scheme. The Issuer's obligations under the Securities are not protected by any statutory or voluntary deposit protection scheme or compensation scheme. Further, no third party guarantees or commitments have been provided in respect of the Issuer's obligations under the Securities. Accordingly, in the event of insolvency of the Issuer, investors may thus experience **a total loss of their investment in the Securities.**

Specific risks related to the dependence on the Underlyings. The Redemption Amount payable in accordance with the Conditions of the Securities depends on the performance of the Underlyings. If the Settlement Price of the Underlying with the lowest performance is lower than the respective Kick In Level, the Redemption Amount could in case of an unfavourable performance of such Underlying even be equal to zero. In such case, the Securityholder will suffer **a total loss of the invested capital.**

Specific risks related to the express structure of the Securities. In case of the occurrence of an Early Redemption Event, the Securities will automatically expire early on the respective Early Redemption Observation Date, a so-called express structure. In such case, Securityholders are entitled to request payment of the Early Redemption Amount, but are not entitled to request any further payments on the Securities. In particular, Securityholders are not entitled to request payment of the Coupon Amount which would have otherwise potentially been due under the Securities in accordance with the Conditions of the Securities.

Specific risks related to the linkage of Securities to the Relevant Underlying. Potential investors should be aware that the level of the Redemption Amount may, in certain circumstances, solely refer to the Underlying with the lowest performance. Potential investors should, consequently, be aware that compared to Securities, which refer to only one underlying, the Securities linked to a portfolio of Underlyings show a higher exposure to loss. This risk may not be reduced by a positive or, as the case may be, negative performance of the remaining Underlyings, because the remaining Underlyings may not be taken into account when calculating the level of the Redemption Amount.

Specific risks related to no further participation in the performance of the Underlyings following the termination and early redemption of the Securities. Potential investors should be aware that the Securities may, pursuant to the

Conditions of the Securities, be terminated and redeemed early in a number of circumstances prior to the Valuation Date. In case of such termination and early redemption of the Securities, the Securityholder is entitled to demand the payment of an amount in the Redemption Currency in relation to this termination and early redemption. However, such amount can be considerably below the amount which would be payable at the scheduled end of the term of the Securities and, if it is lower than the invested capital, Securityholders may even suffer **a total loss of the invested capital**.

Specific risks related to reinvestment. The Securityholders bear the risk that the cash amount received by the Securityholder following a termination and early redemption of the Securities (if any) can only be reinvested by such Securityholder for a term comparable with the scheduled term of the Securities only at market conditions which are less favourable than those prevailing at the time of the acquisition of the Securities. As a result, the yield achieved by this reinvestment may be significantly lower than the return expected by the Securityholder with the purchase of the Securities. Moreover, the likelihood of a loss of such amounts reinvested may have increased significantly.

Specific risks related to the linkage of the payment of any conditional Additional Amount or Coupon Amount to the performance of the Underlyings. Whether Securityholders are entitled to receive any Additional Amount or the Coupon Amount in accordance with the Conditions of the Securities, depends on the performance of the Underlyings. Securityholders bear the risk that they do not receive payment of the Coupon Amount or any Additional Amount in respect of the Securities.

Specific risks related to the pricing of the Securities. Potential investors bear the risk that the market price of the Securities may fluctuate during the term of the Securities, including, without limitation, as a result of any changes in the performance of the Underlyings or any changes in the volatility of the Underlyings. Accordingly, Securityholders bear the risk that if they can sell any Securities prior to their due date, the sale proceeds may fall below (including significantly below) the amount of capital initially invested in the Securities and investors would then **lose some or all of the invested capital**.

Specific risks related to the trading in the Securities / Illiquidity. Potential investors bear the risk that there is no liquid market for trading in the Securities. Due to their structured nature and linkage to the Underlyings, the Securities would generally have a more limited secondary market than conventional debt securities. This means that they may not be able to sell the Securities at a time of their own choosing. This could, in turn, result in potential investors receiving a lower sale price than they would have received had a liquid market existed.

Specific risks related to potential conflicts of interest of the Issuer and its affiliates. The Issuer and its affiliates may have commercial interests that conflict with those of the Securityholders (e.g. as a result of the Issuer's involvement in other transactions or the Issuer's existing business relationship with the issuer of an Underlying) and that may impact the value and/or trading of the Securities. In turn, this could result in Securityholders receiving less when selling any Securities they hold than they would have received but for such conflicts of interest and/or even suffering a partial loss of the invested capital.

Specific risks related to hedging transactions entered into by the Issuer. If the Issuer enters into hedging transactions in connection with the Securities and such hedging transactions are unwound, this could have an impact on the price of the Underlyings and, therefore, on any amounts payable to the Securityholders in respect of the Securities. In such cases, Securityholders could even suffer **a partial loss of the invested capital**.

Risk of fluctuations in the value of the Underlyings. Securityholders are subject to the risks related to the Underlyings in respect of the Securities, whose performance is subject to fluctuations. Therefore, Securityholders cannot foresee the value of the Securities on a certain day in the future. Likewise, the historical data on an Underlying does not allow for any conclusions to be drawn about the future performance of an Underlying and the Securities. An Underlying may have only a short operating history or may have been in existence only for a short period of time and may deliver results over the longer term that may be lower than originally expected. When the Securities are redeemed, exercised or otherwise disposed of on a certain day, substantial losses in value might occur in comparison to a disposal at a later or earlier point in time. The more volatile an Underlying is, the less predictable the amount to be received by the Securityholders. In case of an unfavourable development of the price of an Underlying, the **amount received** by the Securityholders **may be very low or even be equal to zero**.

Section D – Key Information on the offer of Securities to the public and/or the admission to trading on a regulated market

Under which conditions and timetable can I invest in this Security?

It has been agreed that, on or after the respective Issue Date of the Securities, the Manager may purchase Securities and shall place the Securities for sale in Sweden (the "**Public Offer Jurisdiction(s)**") at an amount equal to 100 % of the Nominal Amount (the "**Issue Price**") plus an offering premium of up to 2 % of the Nominal Amount under terms subject to change in the Public Offer Jurisdiction(s) during the Subscription Period. The Issue Price was fixed at the start of the public offer of the Securities. After closing of the Subscription Period, the selling price will then be adjusted on a continual basis to reflect the prevailing market situation.

The total expenses of the issue and/or offer are not separately identifiable and included in the general operating expenses of the Issuer.

The Securities may be subscribed from the Manager during normal banking hours between 30 August 2024 and 3 October 2024 (17:30 Stockholm time) (the “**Subscription Period**”). The Issue Price per Security is payable on the Initial Payment Date. The Issuer reserves the right to early close or to extend the Subscription Period if market conditions so require.

Who is the offeror and/or the person asking for admission to trading?

Offeror: UBS Europe SE, a stock corporation incorporated under German law and domiciled in Germany (the “**Manager**”).
Person asking for admission to trading: the Issuer

Why is this Prospectus being produced?

Use and estimated net amount of the proceeds

The Issuer intends to issue and offer the Securities to the public in order to raise funding for general business purposes of the UBS Group. The net amount of the proceeds is not quantifiable.

Underwriting agreement(s)

It has been agreed that the Manager shall underwrite the Securities on or after the respective Issue Date by means of an underwriting agreement and shall place them for sale under terms subject to change in the Public Offer Jurisdiction(s).

Most material conflicts of interest

The Issuer and affiliated companies may participate in transactions related to the Securities in some way, for their own account or for account of a client. Such transactions may not serve to benefit the Securityholders and may have a positive or negative effect on the value of the Underlyings, and consequently on the value of the Securities. Furthermore, companies affiliated with the Issuer may become counterparties in hedging transactions relating to obligations of the Issuer stemming from the Securities. As a result, conflicts of interest can arise between companies affiliated with the Issuer, as well as between these companies and investors, in relation to obligations regarding the calculation of the price of the Securities and other associated determinations.

Within the context of the offering and sale of the Securities, the Issuer or any of its affiliates may directly or indirectly pay fees in varying amounts to third parties, such as distributors or investment advisors, or receive payment of fees in varying amounts, including those levied in association with the distribution of the Securities, from third parties. Potential investors should be aware that the Issuer may retain fees in part or in full.

Vilka är de viktigaste riskerna som är specifika för Emittenten?

Kreditrisk i relation till UBS AG som Emittent

Varje investerare i värdepapper som emitterats av UBS AG är utsatt för UBS AG:s kreditrisk. Bedömningen av UBS AG:s kreditvärdighet kan påverkas av ett antal faktorer och utvecklingar. Dessa omfattar UBS Group AG:s förvärv av Credit Suisse Group AG och integrationen av koncernerna, UBS anseende, operativa risker, riskhantering och kontrollprocesser, marknadsvillkor och makroekonomiskt klimat, kreditexponering mot klienter och motparter, väsentliga rättsliga och lagstiftningsmässiga risker, betydande förändringar i regleringen, UBS AG:s framgångar i genomförandet av sina strategiska planer samt likviditets- och finansieringshantering.

Om UBS erfar finansiella svårigheter har FINMA befogenheten att starta resolutions- eller likvidationsförfaranden eller införa skyddsåtgärder avseende UBS Group AG, UBS AG, UBS Switzerland AG eller Credit Suisse (Schweiz) AG, och sådana förfaranden eller åtgärder kan ha en betydande negativ inverkan för UBS AG:s borgenärer. Om omstrukturerings- eller avvecklingsförfaranden beslutas gentemot UBS AG, kan innehavare av värdepapper lida en väsentlig eller **fullständig förlust** av värdepapperna.

Avsnitt C – basfakta om Värdepapperen

Vilka är Värdepapperens huvudegenskaper?

Typ av Värdepapper och deras form

Värdepapperen är certifikat utan kapitalskydd. Värdepapperen emitteras i form av värdepapper i ocertifierad och icke fysisk bokningsform enligt svensk lagstiftning. Värdepapperens innehåll (utom formen) samt alla rättigheter och skyldigheter som följer av Värdepapperen regleras av tysk lag.

Rättigheter som följer med Värdepapperen; utbetalningsprofil vid planenlig löptid

När Värdepapperen förfaller till betalning har Värdepappersinnehavaren krav på betalning av Inlösenbeloppet i Inlösenvalutan. I synnerhet beror storleken på det eventuella Inlösenbelopp som Värdepappersinnehavaren ska erhålla när Värdepapperen förfaller till betalning på utvecklingen av de Underliggande och huruvida en Kick-in-händelse har inträffat.

En "**Kick-in-händelse**" ska ha inträffat, om Avräkningskursen för minst en Underliggande_(k) är lägre än respektive Kick-In-nivå_(k).

Om Värdepapperen inte förfaller i förtid är innehavarna av Värdepapperen på relevant Förfallodag berättigade till att erhålla betalning för "**Inlösenbeloppet**", som fastställs på den relevanta Värderingsdagen enligt följande:

- (a) Om det inte har inträffat en Kick-in-händelse och om Avräkningskursen för alla Underliggande_(k) är lika med eller överstiger respektive Inlösennivå_(k), är Värdepappersinnehavaren berättigad till att erhålla Beräkningsbeloppet plus det Slutliga Tilläggsbeloppet.
- (b) Om det inte har inträffat en Kick-in-händelse och om Avräkningskursen för minst en Underliggande_(k) understiger respektive Inlösennivå_(k), är Värdepappersinnehavaren berättigad till att erhålla Beräkningsbeloppet.
- (c) Om en Kick-in-händelse har inträffat, är Värdepappersinnehavaren berättigad till att erhålla Beräkningsbeloppet multiplicerat med Avräkningskursen_(k) för den Underliggande_(k) med det sämsta resultatet delat med Lösenpriset_(k) för sådan Underliggande_(k).

Förtida Inlösen

I händelse av att den officiella stängningskursen för alla Underliggande_(k) enligt vad som fastställts av respektive Priskälla_(k) på respektive Observationsdag för Förtida Inlösen är lika med eller överstiger respektive Förtida Inlösennivå_(k) (sådan händelse utgör en "**Förtida Inlösenhändelse**"), förfaller Värdepapperen i förtid på respektive Observationsdag för Förtida Inlösen, och Värdepappersinnehavaren är berättigad till att erhålla Förtida Inlösenbeloppet på det relevanta Förfallodag i Inlösenvalutan. Värdepappersinnehavaren är därefter inte berättigad till ytterligare betalningar.

Kupong

Värdepappersinnehavarna är berättigade till att erhålla betalning av Kupongbeloppet i Inlösenvalutan på Kupongutbetalningsdagen, emellertid beroende på utvecklingen för de Underliggande.

Om på Kupongobservationsdagen antingen Priset på minst en Underliggande_(k) är lägre än dess respektive Kupongnivå_(k), eller om Priset på alla Underliggande_(k) är lika med eller överstiger respektive Inlösennivå_(k), så erhåller inte Värdepappersinnehavarna betalning av Kupongbeloppet på den Kupongutbetalningsdagen (sådan händelse utgör en "**Händelse av uteblivande av Kupongbeloppet**").

Emittenten är berättigad till att säga upp Värdepapperen med omedelbar verkan om en (extraordinär) händelse som föranleder uppsägning av Värdepapperen inträffar. Exempel på (extraordinära) händelser som föranleder uppsägning av Värdepapperen inkluderar att fastställandet/publiceringen av Priset på en Underliggande upphör eller att en lagändring inträffar. Det betalbara beloppet vid uppsägning av Värdepapperen som är betalbart till Värdepappersinnehavarna kan i sådant fall vara avsevärt lägre än det kapital som investerades av Värdepappersinnehavarna vid förvärvet av Värdepapperen (inklusive transaktionskostnader).

Värdepapperens relativa senioritet i Emittentens kapitalstruktur i händelse av insolvens

Värdepapperen utgör direkta, icke-säkerställda och icke-efterställda förpliktelser för Emittenten, som rangordnas lika sinsemellan och med alla andra nuvarande och framtida icke-säkerställda och icke-efterställda förpliktelser för Emittenten, annat än skyldigheter som regleras i tvingande lagstiftning.

Restriktioner för den fria överlåtbarheten för Värdepapperen

Värdepapperen är fritt överlåtbara.

Var kommer Värdepapperen att handlas?

Vi avser att ansöka om notering av Värdepapperen på Nasdaq Stockholms reglerade marknad.

Vilka är de allvarigaste riskerna som är specifika för Värdepapperen?

Värdepappersinnehavarna är exponerade för risken för skuldnedskrivning. I händelse av att FINMA, i egenskap av tillsynsmyndighet för finansmarknaderna i fråga om Emittenten, vidtar resolutionsåtgärder mot denne och gör en nedskrivning av värdet på Värdepapperen, eller konverterar Värdepapperen till primärkapital, har inte Värdepappersinnehavarna några ytterligare krav mot Emittenten av Värdepapperen.

Det finns inget i lag föreskrivet system för garanti av insättningar eller något insättningsgarantisystem på frivillig basis som ger dig som investerare skydd för Värdepapperen. Emittentens förpliktelser som är förenade med Värdepapperen garanteras inte genom något lagstadgat eller frivilligt system för garanti av insättningar, eller genom kompensationsplaner av något slag. Vidare har inga garantier eller löften från tredje part utfärdats beträffande Emittentens förpliktelser som är förenade med Värdepapperen. Om Emittenten blir insolvent kan följaktligen Värdepappersinnehavare lida **en total förlust av sina investeringar i Värdepapperen.**

Specifika risker som hänför sig till beroendet av de Underliggande. Inlösenbeloppet som utbetalas i enlighet med Villkoren för Värdepapperen är beroende av utvecklingen av de Underliggande. Om Avräkningskursen för den Underliggande med det lägsta utvecklingen är lägre än respektive Kick-In-nivå Inlösenbeloppet kan i händelse av en ogynnsam utveckling av sådan Underliggande till och med vara lika med noll. I sådant fall kommer Värdepappersinnehavaren att lida **en total förlust av det investerade kapitalet.**

Specifika risker som hänför sig till Värdepapperens expresstruktur. Vid en Förtida Inlösenhändelse förfaller Värdepapperen i förtid automatiskt på respektive Observationsdag för Förtida Inlösen, en så kallad expresstruktur. Värdepappersinnehavarna är i sådant fall berättigade till att begära utbetalning av Förtida Inlösenbeloppet, men är inte berättigade till att begära ytterligare utbetalningar enligt Värdepapperen. I synnerhet så har Värdepappersinnehavarna inte rätt att begära utbetalning av Kupongbeloppet som annars potentiellt skulle ha förfallit under Värdepapperen i enlighet med Villkoren för Värdepapperen.

Specifika risker som hänför sig till kopplingen av Värdepapper till den relevanta Underliggande. Potentiella investerare bör vara medvetna om att nivån på Inlösenbeloppet under vissa omständigheter endast avser den Underliggande med den lägsta utvecklingen. Vi vill därför uppmärksamma potentiella investerare på att Värdepapper kopplade till en portfölj med Underliggande uppvisar en större exponering för förlust jämfört med värdepapper som endast avser en Underliggande. Denna risk reduceras inte genom en positiv eller, i förekommande fall, negativ utveckling för de resterande Underliggande eftersom de resterande Underliggande inte tas i beaktande vid beräkningen av nivån på Inlösenbeloppet.

Specifika risker som hänför sig till inget fortsatt deltagande i utvecklingen av de Underliggande efter uppsägning och förtida inlösen av Värdepapperen. Potentiella investerare bör vara medvetna om att Värdepapperen kan, enligt Villkoren för Värdepapperen, under flera olika omständigheter sägas upp och förtidsinlösas innan Värderingsdagen. I händelse av sådan uppsägning och förtida inlösen av Värdepapperen är Värdepappersinnehavaren berättigad till att begära utbetalning av en beloppet i Inlösenvalutan i förhållande till uppsägningen och den förtida inlösen av Värdepapperen. Sådant belopp kan emellertid vara avsevärt lägre än det belopp som skulle ha utbetalats vid det planerade slutet av löptiden för Värdepapperen, och Värdepappersinnehavarna kan till och med lida **en total förlust av det investerade kapitalet** om beloppet är lägre än det kapital som investerats.

Specifika risker som hänför sig återinvestering. Värdepappersinnehavarna bär risken att det kontantbelopp som erhålles av Värdepappersinnehavaren efter en uppsägning och förtida inlösen av Värdepapperen (i förekommande fall) endast kan återinvesteras av sådan Värdepappersinnehavare för en löptid jämförbar med den planerade löptiden för Värdepapperen, och endast till marknadsvillkor som är mindre gynnsamma än de som rådde vid tidpunkten för förvärvet av Värdepapperen. Den avkastning som uppnås genom denna återinvestering kan följaktligen vara avsevärt lägre jämfört med den avkastning som Värdepappersinnehavaren förväntade sig vid förvärvet av Värdepapperen. Dessutom, kan sannolikheten för en förlust av sådana belopp som återinvesteras ha ökat avsevärt.

Specifika risker som hänför sig till kopplingen av betalningen av något villkorat Tilläggsbelopp eller Kupongbelopp till utveckling av de Underliggande. Huruvida Värdepappersinnehavare har rätt att erhålla något Tilläggsbelopp eller Kupongbeloppet i enlighet med Villkoren för Värdepapperen beror på de Underliggandes utveckling. Värdepappersinnehavare bär risken att de inte erhåller betalning av Kupongbeloppet eller något Tilläggsbelopp avseende Värdepapperen.

Specifika risker som hänför sig till prissättningen av Värdepapperen. Potentiella investerare bär risken att marknadspriset på Värdepapperen kan fluktuera under Värdepapperens löptid, inklusive, utan begränsning, till följd av eventuella förändringar i utvecklingen av de Underliggande eller eventuella förändringar i volatiliteten av de Underliggande. Följaktligen bär Värdepappersinnehavarna risken att om de säljer Värdepapper innan deras förfallodag kan försäljningsintäkterna sjunka till under (inklusive avsevärt under) det kapitalbelopp som ursprungligen investerades i Värdepapperen, och investerarna skulle då **förlora en del av eller hela det investerade kapitalet**.

Specifika risker som hänför sig till handeln med Värdepapperen/svag likviditet. Potentiella investerare bär risken att det inte finns någon likvid marknad för handel med Värdepapperen. Generellt sett är andrahandsmarknaden för Värdepapperen mer begränsad än för konventionella skuldpaper på grund av Värdepapperens strukturerade beskaffenhet och koppling till de Underliggande. Det innebär att det inte är säkert att investeraren kan sälja Värdepapperen vid en tidpunkt efter eget val. Detta kan, i sin tur, medföra att potentiella investerare får ett lägre försäljningspris än de skulle fått om det hade funnits en likvid marknad.

Specifika risker som hänför sig till intressekonflikter för Emittenten och dess närstående bolag. Emittenten och dess närstående bolag kan ha kommersiella intressen som står i strid med Värdepappersinnehavarnas (t.ex. som ett resultat av Emittentens deltagande i andra transaktioner eller Emittentens befintliga affärsförhållande med emittenten av en Underliggande), och som kan påverka värdet på och/eller handeln med Värdepapperen. Detta kan, i sin tur, medföra att Värdepappersinnehavarna erhåller mindre när de säljer Värdepapper de innehar än de skulle erhållit om sådan intressekonflikt inte hade förelegat, och/eller till och med lida en delförlust av det investerade kapitalet.

Specifika risker som hänför sig till säkringstransaktioner som Emittenten ingår. Om Emittenten ingår säkringstransaktioner i samband med Värdepapperen och sådana säkringstransaktioner avvecklas, kan detta påverka priset på de Underliggande och därmed eventuella belopp som ska betalas till Värdepappersinnehavarna avseende Värdepapperen. I sådana fall kan Värdepappersinnehavare till och med lida **en partiell förlust av det investerade kapitalet**.

Risk för fluktuationer i värdet på de Underliggande. Värdepappersinnehavarna är föremål för de risker som hänför sig till de Underliggande med avseende på Värdepapperen, vars utvecklingen är föremål för fluktuationer. Värdepappersinnehavarna kan därför inte förutse värdet på Värdepapperen en viss dag i framtiden. På samma sätt gör de historiska uppgifterna om en Underliggande inte det möjligt att dra några slutsatser om den framtida utvecklingen för en Underliggande och Värdepapperen. En Underliggande kan bara ha en kort rörelsehistorik eller kan ha funnits endast under en kort tidsperiod och kan leverera resultat på längre sikt som kan vara lägre än vad som ursprungligen förväntades. När Värdepapperen löses in, när de med Värdepapperen förenade rättigheterna utövas, eller när Värdepapperen på annat sätt avyttras på en viss dag kan det uppstå en väsentlig värdeförlust jämfört med om Värdepapperen hade avyttrats vid ett senare eller tidigare tillfälle. Ju mer volatila en Underliggande är, desto mindre förutsägbart blir det belopp som Värdepappersinnehavarna ska erhålla. I händelse av en ogynnsam utveckling av priset på en Underliggande kan det **belopp som kommer att erhållas** av Värdepappersinnehavarna **vara mycket lågt, eller till och med lika med noll**.

Varför har Prospektet tagits fram?

Användning och uppskattning av nettointäkt

Emittenten avser att emittera Värdepapperen och erbjuda dem för allmänheten i syfte att skaffa medel för UBS-koncernens allmänna rörelseändamål. Nettointäkterna är inte kvantifierbara.

Garantiavtal ("*underwriting agreement*")

En överenskommelse har träffats om att Managern fullt ut ska underteckna en nyemission av Värdepapperen på eller efter respektive Emissionsdag genom en garantiavtal ("*underwriting*"), och erbjuda Värdepapperen till försäljning enligt villkor med ändringar förbehållna i Jurisdiktion(erna) för Erbjudande till Allmänheten.

De mest väsentliga intressekonflikterna

Emittenten och dess dotterbolag kan ingå transaktioner som relaterar till Värdepapperen på ett eller annat sätt, antingen för egen räkning eller på uppdrag av en kund. Sådana transaktioner är inte nödvändigtvis gynnsamma för Värdepappersinnehavarna, och kan ha såväl en positiv som en negativ effekt på värdet av de Underliggande och, följaktligen, på värdet av Värdepapperen. Vidare kan dotterbolag till Emittenten vara motparter i hedgningstransaktioner som relaterar till Emittentens förpliktelser under Värdepapperen. Som ett resultat kan intressekonflikter uppstå mellan dotterbolag till Emittenten såväl som mellan dessa bolag och investerare, med avseende på skyldigheter beträffande beräkningen av kursen för Värdepapperen och andra därmed förknippade fastställanden.

Inom ramen för erbjudandet och försäljningen av Värdepapperen, kan Emittenten eller dotterbolag direkt eller indirekt betala arvoden av olika storlek till tredje parter, såsom distributörer eller investeringsrådgivare, eller erhålla arvoden av olika storlek, inklusive sådana som tas ut i samband med distribution av Värdepapperen, från tredje parter. Potentiella investerare bör vara medvetna om att Emittenten kan behålla arvoden helt eller delvis.
