Most material risk factors pertaining to the guarantor

1. A substantial increase in new provisions or a shortfall in the level of previously recorded provisions exposed to credit risk and counterparty risk could adversely affect the BNP Paribas Group's results of operations and financial condition
2. The BNP Paribas Group's risk management policies, procedures and methods may leave it exposed to unidentified or unanticipated risks, which could lead to material losses
3. The BNP Paribas Group may incur significant losses on its trading and investment activities due to market fluctuations and volatility
4. The BNP Paribas Group's access to and cost of funding could be adversely affected by a resurgence of financial crises, worsening economic conditions, rating downgrades, increases in sovereign credit spreads or other factors
5. Adverse macroeconomic and financial conditions have in the past had and may in the future significantly affect the BNP Paribas Group and the markets in which it operates
6. Laws and regulations adopted in recent years, as well as current and future legislative and regulatory developments, may significantly impact the BNP Paribas Group and the financial and economic environment in which it operates.
7. Should the BNP Paribas Group fail to implement its strategic objectives or to achieve its published financial objectives, or should its results not follow stated expected trends, the trading price of its securities could be adversely affected.

What are the key risks that are specific to the securities?

Most material risk factors specific to the securities

There are also risks associated with the Securities, including:

1. Risks related to the structure of the securities:

The return on the Securities depends on the performance of the Underlying Reference(s) and the capital protection applies only at Maturity.

2. Risks related to the underlying and its disruption and adjustments:

Index Securities are linked to the performance of an underlying index (an "Index"), which may reference various asset classes such as, equities, bonds, currency exchange rates or property price data, or could reference a mixture of asset classes. Investors in Index Securities face the risk of a broader set of circumstances that mean that the assets underlying the Index do not perform as expected compared to an investment in conventional debt securities. Accordingly, the return on an investment in Index Securities is more likely to be adversely affected than an investment in conventional debt securities.

Exposure to indices, adjustment events and market disruption or failure to open of an exchange may have an adverse effect on the value and liquidity of the Securities. The value of underlying fund shares or units or the level of an underlying fund index in respect of Fund Securities will be affected by the investment strategy of the relevant fund. The investment strategy is often opaque and may not be publicly available. In addition, funds are often illiquid and/or unregulated. If the investment strategy does not perform as expected, there are limited methods by which direct investments in fund shares or units can be exited. The value of the fund shares or units or the level of a fund index is also exposed to the performance of various fund service providers, in particular, the investment adviser. Taking these circumstances into account, compared to other types of investment, there is a greater risk associated with an investment in Fund Securities that the value of the Securities may be adversely affected (and could fall to zero) and the return may be less (and could be significantly less) than expected.

Exposure to a fund share [or unit] [or fund index], similar risks to a direct fund investment, extraordinary fund events may have an adverse effect on the value or liquidity of the Securities.

3. Risks related to the trading markets of the securities:

The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

4. Legal risks:

The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

Mest väsentliga riskfaktorer som gäller garanten

1. En väsentlig ökning i nya avsättningar, eller ett underskott i nivån på tidigare redovisade avsättningar som varit exponerade för kreditrisker och risker vad gäller motparter skulle negativt kunna påverka BNP Paribas Grupp verksamhetsresultat och finansiella ställning.
2. BNP Paribas-koncernens riskhanteringspolicyer, förfaranden och metoder kan exponera den för oidentifierade eller oförutsedda risker som kan leda till materialförluster.
3. BNP Paribas Grupp kan ådra sig väsentliga förluster vid handels- och investeringsverksamhet till följd av valutakursfluktuationer och volatilitet.
4. BNP Paribas Grupp tillgång till och kostnader för finansiering skulle kunna påverkas negativt av nya ekonomiska kriser, sämre konjunkturläge, lägre kreditvärdering, ökning av kreditspreaden eller andra faktorer.
5. Negativa makroekonomiska och finansiella förhållanden har tidigare haft och kan i framtiden ha en betydande inverkan på BNP Paribas-koncernen och de marknader på vilka den verkar.
6. Lagar och förordningar som antagits under de senaste åren, liksom nuvarande och framtida lagstiftnings- och regleringsutvecklingar, kan avsevärt påverka BNP Paribas-koncernen och den finansiella och ekonomiska miljön i vilken den verkar.
7. Skulle BNP Paribas-koncernen misslyckas med att implementera sina strategiska objektiva eller med att uppnå sina publicerade finansiella objektiva, eller om dess resultat inte följer förväntade trender, kan marknadspriset på dess värdepapper påverkas negativt.

Vilka är de centrala riskerna som är specifika för värdepapperna?

Mest väsentliga riskfaktorer som är specifika för värdepapperna

Det finns även risker som är förknippade med Värdepapperna, inklusive:

1. Risker som är relaterad till värdepappernas struktur:

Avkastningen på värdepapperna beror på avkastningen på de underliggande referenserna och kapitalskyddet endast tillämpas på förfallodagen.

2. Risker som är relaterade till de underliggande och dess avbrott och justeringar:

Indexvärdepapper är kopplade till utvecklingen på underliggande index (ett "index"), som kan innehålla olika tillgångsklasser såsom aktier, obligationer, utländsk valuta eller värde på fastigheter eller kan referera till en blandning av tillgångsklasser. Investerare i Indexvärdepapper står inför risker som har ett bredare spektrum, vilket betyder att tillgångarna som Index baserar sig på inte utvecklar sig som man tror jämfört med en investering i en konventionell obligation. Därför är avkastningen på en investering i Indexvärdepapper antagligen mer negativt än en investering i konventionella obligationer.

Exponering mot index, justerade händelser och marknadsavbrott eller misslyckad handel kan ha negativa effekter på värdepapperets värde och likviditet. Värdet på underliggande fondaktier eller andelar eller nivån på ett underliggande fondindex vad gäller Fondvärdepapper kan påverkas av den relevanta fondens investeringsstrategi. Investeringsstrategin är ofta dunkel och kanske inte offentligt tillgänglig. Dessutom är fonder ofta inte likvida och/eller oreglerade. Om investeringsstrategin inte presterar som förväntat är det svårt att plocka ut direktinvesteringar ur fondaktier eller andelar. Värdet på fondaktier, andelar eller nivån på ett fondindex är även beroende av utvecklingen hos olika fondförvaltare, särskilt investeringsrådgivaren. Med hänsyn till dessa omständigheter och jämfört med andra typer av investeringar är risken större när den är kopplad till en investering i Fondvärdepapper, att värdet på värdepapperet kan påverkas negativt (och kan gå ner till noll) och avkastningen kan bli mindre (och kan bli mycket mindre) än förväntat.

Exponering mot en fondaktie [eller fondindex], likartad risk mot en direktfondinvestering, extraordinära fondhändelser kan ha en negativ effekt på värdet eller likviditeten på värdepapperen.

3. Risker som är relaterade till handel med värdepapper:

Kursen på Värdepapper kan påverkas av ett antal faktorer inklusive, men inte begränsat till, det gällande priset eller nivån på Underliggande Referenser, återstående tid på Värdepapperets planerade inlösendag, aktuell eller implicit volatilitet som är förknippat med den Underliggande Referensen och risken med det inbördes förhållandet till gällande Underliggande Referens(er). Möjligheten att Värdepapperets kurs kommer att fluktuerar (antingen uppåt eller nedåt) beror på ett antal faktorer som investeraren nog borde överväga innan köp eller försäljning av Värdepapper.

4. Rättsliga risker:

Villkoren för Värdepapper kommer innehålla bestämmelser för hur man ska kalla till möten mellan innehavare av aktuella värdepapper för att belysa frågor som generellt sett påverkar deras intressen. Dessa bestämmelser ger angivna majoriteter rätten att fatta beslut som binder alla innehavare, inklusive innehavare som inte har närvarat eller röstat på aktuellt möte och innehavare som röstat mot majoriteten.

Mest väsentliga intressekonflikterna rörande erbjudandet eller upptagandet till handel

Förvaltaren och dess dotterbolag kan också ha varit verksamma, och kan även i framtiden bli verksamma vad gäller investeringar och börshandel och kan utföra andra tjänster för Emittenten och Garanten och deras respektive dotterbolag.

Olika företag inom BNPP-koncernen (inklusive Emittenten och Garanten) och Dotterbolag åtar sig olika roller i samband med Värdepapperna, inklusive Värdepappernas Emittent och Värdepappernas Beräkningsombud och kan även utföra handelsrelaterade verksamheter (inklusive risksäkringsverksamhet) som hänför sig till Underliggande och andra instrument eller derivatprodukter baseras på eller som är relaterade till de Underliggande. Detta kan förorsaka möjliga intressekonflikter.

BNP Paribas Financial Markets SNC som verkar som Förvaltare och Beräkningsombud, är ett Dotterbolag till Emittenten och Garanten och potentiella intressekonflikter kan finnas mellan Värdepappernas innehavare, inklusive och med hänsyn till vissa beslut och bedömningar som Beräkningsombuden måste göra. De ekonomiska intressena hos Emittenten och hos BNP Paribas Financial Markets SNC såsom Förvaltare och Beräkningsombud, är potentiellt motsatta till intressena hos Innehavare av Värdepapperna.

Annat än vad som nämnts ovan och såvitt Emittenten vet, har ingen person som är involverad i Värdepappersemissionerna något intresse i erbjudandet, inklusive de motstridiga intressena.
