Qualifications in audit report on historical financial information: There are no qualifications in the audit report of the Issuer on its audited historical financial information.

What are the key risks that are specific to the Issuer?

The Issuer is subject to the following key risks:

- The Issuer is subject to intra-group credit risk. From time to time, the Issuer enters into derivative transactions with CGML to offset or hedge its liabilities to securityholders under securities issued by it (which may include the Securities). As such, the Issuer is exposed to the credit risk of CGML in the form of counterparty risk in respect of such derivative transactions. In particular, the Issuer's ability to fulfil its obligations under the Securities is primarily dependent on CGML performing its counterparty obligations owed to the Issuer in respect of such derivative transactions in a timely manner, and any failure by CGML to do so will negatively affect the ability of the Issuer to fulfil its obligations under the Securities. Securityholders will not have any recourse to CGML under any such derivative transactions.
- The Issuer may not be able to maintain its current ratings. If a rating agency reduces, suspends or withdraws its rating of the Issuer and/or any affiliate thereof, the liquidity and market value of the Securities are likely to be adversely affected. Ratings downgrades could also have a negative impact on other funding sources, such as secured financing and other margin requirements, for which there are no explicit triggers.
- Following the military action by Russia in Ukraine, the U.S. has imposed, and is likely to impose material additional, financial and economic sanctions and export controls against certain Russian organisations and/or individuals, with similar actions implemented and/or planned by the European Union, the UK and other jurisdictions. The Group's ability to engage in activity with certain consumer and institutional businesses in Russia and Ukraine or involving certain Russian or Ukrainian businesses and customers is dependent in part upon whether such engagement is restricted under any current or expected U.S., European Union, UK or other countries' sanctions and laws, or is otherwise discontinued in light of these developments. Sanctions and export controls, as well as any actions by Russia, could adversely affect the Group's business activities and customers in and from Russia and Ukraine. Any negative impact of Russia's actions in Ukraine, and related sanctions, export controls and similar actions or laws on the Group, including the Issuer, could adversely affect the ability of the Issuer to fulfil its obligations under the Securities, and the value of and return on the Securities may also be adversely affected.

Qualifications in audit report on historical financial information: There are no qualifications in the audit report of the Guarantor on its audited historical financial information.

Key risks in respect of the Guarantor: The Guarantor is subject to the following key risks:

- The Guarantor is exposed to concentrations of risk, particularly credit and market risk. As regulatory or market developments continue to lead to increased centralisation of trading activities, the Guarantor could experience an increase in concentration of risk, which could limit the effectiveness of any hedging strategies and cause the Guarantor to incur significant losses. The Guarantor may be affected by macroeconomic, geopolitical and other challenges, uncertainties and volatilities, including the global COVID-19 pandemic and the military action by Russia in Ukraine (and related sanctions, export controls and similar actions or laws), which may negatively impact the businesses of the Guarantor and its ability to fulfil its obligations under the Securities, and the value of and return on the Securities.
- The Guarantor may not be able to maintain its current ratings. If a rating agency reduces, suspends or withdraws its rating of the Guarantor and/or any affiliate thereof, the liquidity and market value of the Securities are likely to be adversely affected. Ratings downgrades could also have a negative impact on other funding sources, such as secured financing and other margin requirements, for which there are no explicit triggers.
- If the relevant resolution authority is satisfied that the Guarantor is failing or likely to fail, and subject to certain other conditions being satisfied, the Guarantor may be subject to action taken by the resolution authority, including potentially the write down of claims of unsecured creditors of the Guarantor (such as under the deed of guarantee) and the conversion of unsecured debt claims (such as under the deed of guarantee) to other instruments (e.g. equity shares), the transfer of all or part of the Guarantor's business to another entity, or other resolution measures. As a result of any such action, investors could lose some or all of their investment in the Securities.

What are the key risks that are specific to the Securities?

The Securities are subject to the following key risks:

- You should be prepared to sustain a total or partial loss of the purchase price of your Securities. The value of Securities prior to their scheduled termination may vary due to a number of interrelated factors, including the value, dividend yield and volatility of the Underlying(s) and any changes in interim interest rates if applicable, and a sale of Securities prior to their scheduled termination may be at a substantial discount from the original purchase price and you may lose some or all of your investment. If, at settlement, a Termination Barrier Event and Termination Lower Barrier Event have occurred, the Securities may be terminated for less than your initial investment or even zero. Further, you will receive no coupon amount during the term of the Securities.
- The Issuer's obligations under the Securities and the Guarantor's obligations under the deed of guarantee represent general contractual obligations of each respective entity and of no other person. Accordingly, payments under the Securities are subject to the credit risk of the Issuer and the Guarantor. Securityholders will not have recourse to any secured assets of the Issuer and Guarantor in the event that the Issuer or Guarantor is unable to meet its obligations under the Securities, including in the event of an insolvency, and therefore risk losing some or all of their investment.
- Securities may have no established trading market when issued, and one may never develop, so investors should be prepared to hold the Securities until settlement. If a market does develop, it may not be very liquid. Consequently, you may not be able to sell your Securities easily or at all or at prices equal to or higher than your initial investment and in fact any such price may be substantially less than the original purchase price. Illiquidity may have a severely adverse effect on the market value of Securities.
- Amounts due in respect of the Securities are linked to the performance of the Underlying(s), which is a basket of shares. The value of a share may go down as well as up and the value of a share on any date may not reflect its performance in any prior period. The value and price volatility of a share, may affect the value of and return on the Securities.
- The Securities do not create an actual interest in, or ownership of, an Underlying and accordingly you will not have voting rights or rights to receive dividends or distributions or any other rights with respect to an Underlying. A Security will not represent a claim against an Underlying and, in the event that the amount paid on termination of the Securities is less than your investment, you will not have recourse under any relevant Security to an Underlying in respect of such Securities. You will have no legal or beneficial interest in an Underlying. You may receive a lower return on the Securities than you would have received had you invested directly in an Underlying or through another product.
- The terms and conditions of Securities include provisions dealing with the postponement of dates on which the price of an Underlying is scheduled to be taken. Such postponement or alternative provisions for valuation provided in the terms and conditions of the Securities may have an adverse effect on the value of such Securities.
- The calculation agent may make adjustments to the terms of the Securities to account for the effect of certain adjustment events occurring in respect of the Securities or an Underlying and/or hedging arrangements, or may replace an Underlying with a new share. Any such adjustments may have an adverse effect on the value of such Securities.
- In certain circumstances (for example, if the calculation agent determines that no calculation, adjustment or substitution can reasonably be made, following an event of default or certain events affecting an Underlying or the Issuer's hedging arrangements,

<p>or for reasons relating to taxation or illegality), the Securities may be early terminated. If the Securities are terminated early, the amount paid may be less than your initial investment and you may therefore sustain a loss.</p> <ul style="list-style-type: none"> Following the occurrence of a Mandatory Early Termination Barrier Event, the Securities will be terminated on the relevant Mandatory Early Termination Date at the relevant Mandatory Early Termination Amount and no further amount shall be payable in respect of the Securities after the Mandatory Early Termination Date. In this case, you are subject to a reinvestment risk, as you may not be able to replace your investment in the Securities with an investment that has a similar profile of chances and risks as the Securities.

Vilka nyckelrisker är specifika för Emittenten?

Emittenten är föremål för följande nyckelrisker:

- Emittenten är föremål för koncernintern kreditrisk. Ibland ingår Emittenten derivattransaktioner med CGML för att kompensera eller säkra sina skulder till värdepappersinnehavare under värdepapper som emitterats av den (som kan inkludera Värdepappern). Som sådan är Emittenten exponerad för kreditrisken hos CGML i form av motpartsrisk för sådana derivattransaktioner. Emittentens förmåga att uppfylla sina skyldigheter enligt Värdepappern är främst beroende av att CGML utför sina motpartsförpliktelser som det är skyldigt Emittenten i fråga om sådana derivattransaktioner i tid, och eventuella misslyckanden från CGML att göra detta kommer att påverka Emittentens förmåga att fullgöra sina skyldigheter enligt Värdepappern. Värdepappersinnehavare kommer inte ha några krav gentemot CGML under sådana derivattransaktioner.
- Emittenten kanske inte kan behålla sina nuvarande kreditbetyg. Om ett kreditvärderingsinstitut minskar, ställer in eller drar tillbaka sitt betyg på Emittenten och/eller något av dess dotterföretag, kommer sannolikt Värdepapperns likviditet och marknadsvärde påverkas negativt. Nedgraderingar av kreditbetyg kan också ha en negativ inverkan på andra finansieringskällor, till exempel säkerställd finansiering och andra marginalkrav, för vilka det inte finns några uttryckliga utlösande faktorer.
- Efter Rysslands militära aktion i Ukraina har USA infört, och kommer sannolikt att införa väsentliga ytterligare, finansiella och ekonomiska sanktioner och exportkontroller mot vissa ryska organisationer och/eller individer, med liknande åtgärder som genomförs och/eller planeras av Europeiska unionen, Storbritannien och andra jurisdiktioner. Koncernens förmåga att bedriva verksamhet med vissa konsument- och institutionella verksamheter i Ryssland och Ukraina eller som involverar vissa ryska eller ukrainska verksamheter och kunder beror delvis på om sådant engagemang är begränsat enligt nuvarande eller förväntade sanktioner och lagar i USA, Europeiska unionen, Storbritannien eller andra länder, eller på annat sätt avbryts mot bakgrund av denna utveckling. Sanktioner och exportkontroller, liksom eventuella åtgärder från Rysslands sida, kan påverka koncernens affärsverksamhet och kunder i och från Ryssland och Ukraina negativt. Eventuella negativa effekter av Rysslands agerande i Ukraina, och relaterade sanktioner, exportkontroller och liknande åtgärder eller lagar på Koncernen, inklusive Emittenten, kan negativt påverka Emittentens förmåga att fullgöra sina skyldigheter enligt Värdepappern, och värdet på och avkastningen från Värdepappren kan också påverkas negativt.

Nyckelrisker i förhållande till Garanten: Garanten är föremål för följande nyckelrisker:

- Garanten är utsatt för koncentrationer av risker, särskilt kredit- och marknadsrisker. Eftersom reglerings- eller marknadsutvecklingen fortsätter att leda till ökad centralisering av handelsverksamheten, kan Garanten uppleva en ökad koncentration av risk, vilket kan begränsa effektiviteten för alla säkringsstrategier och få Garanten att drabbas av betydande förluster. Garanten kan påverkas av makroekonomiska, geopolitiska och andra utmaningar, osäkerheter och volatiliteter, inklusive den globala COVID-19-pandemin och den militära åtgärden av Ryssland i Ukraina (och relaterade sanktioner, exportkontroller och liknade åtgärder och lagar), vilket kan påverka Garantens verksamhet negativt och dess förmåga att uppfylla sina skyldigheter enligt Värdepapparen, och värdet på och avkastningen på Värdepapparen.
- Garanten kanske inte kan behålla sina nuvarande kreditbetyg. Om ett kreditvärderingsinstitut minskar, ställer in eller drar tillbaka sitt betyg på Emittenten och/eller något av dess dotterföretag, kommer sannolikt Värdepapparen likviditet och marknadsvärde påverkas negativt. Nedgraderingar av kreditbetyg kan också ha en negativ inverkan på andra finansieringskällor, till exempel säkerställd finansiering och andra marginalkrav, för vilka det inte finns några uttryckliga utlösande faktorer.
- Om den relevanta resolutionsmyndigheten är övertygad om att Garanten fallerar eller sannolikt kommer att fallera, och under förutsättning att vissa andra villkor är uppfyllda, kan Garanten bli föremål för åtgärder som vidtas av resolutionsmyndigheten, inbegripet potentiellt nedskrivning av fordringar från borgenärer utan säkerhet för Garanten (t.ex. enligt garantihandlingen *deed of guarantee*) och konvertering av fordringar utan säkerhet (t.ex. enligt garantihandlingen) till andra instrument (t.ex. eget kapital aktier), överlätelse av hela eller delar av Garantens verksamhet till en annan enhet eller andra resolutionsåtgärder. Som ett resultat av en sådan åtgärd kan investerare förlora en del av eller hela sin investering i Värdepapparen.

Vilka nyckelrisker är specifika för Värdepapparen?

Värdepapparen är föremål för följande nyckelrisker:

- Du bör vara beredd att drabbas av en total eller delvis förlust av inköpskursen för dina Värdepapper. Värdet på Värdepapper före dessas planerade avslutande kan variera beroende på ett antal sammanhangande faktorer, inklusive värdet, utdelningsavkastningen och volatiliteten hos de(n) Underliggande och eventuella förändringar i mellanliggande räntesatser, om tillämpligt, och en försäljning av Värdepapper före dessas planerade avslutande kan ha en betydande rabatt från det ursprungliga inköpspriset och du kan förlora en del av eller hela din investering. Om, vid avveckling, en Barriärhändelse (Avslut) och en Lägre Barriärhändelse (Avslut) har inträffat, kommer Värdepapparen att lösas in för mindre än din initiala investering eller till och med noll. Om, vid förfall, en Barriärhändelse (Avslut) har inträffat, kan Värdepapparen avslutas för mindre än din initiala investering eller rentav noll. Vidare du kommer inte att få något kupongbelopp ränta under Värdepapparenens löptid.
- Emittentens föpliktelser enligt Värdepapparen och Garantens föpliktelser enligt garantin utgör allmänna avtalade föpliktelser för respektive enhet och för ingen annan person. Följaktligen är betalningar under Värdepapparen föremål för kreditrisken hos Emittenten och Garanten. Värdepappersinnehavare kommer inte att ha tillgång till några pantsatta tillgångar hos Emittenten och Garanten i händelse av att Emittenten eller Garanten inte kan uppfylla sina föpliktelser enligt Värdepapparen, inklusive i fall av insolvens, och därfor riskerar att förlora en del av eller hela sin investering.
- Värdepapper kanske inte har någon etablerad handelsmarknad när de emitteras, och en kanske aldrig utvecklas, så investerare bör vara beredda att hålla Värdepapparen fram till avveckling. Om en marknad utvecklas kanske den inte är väldigt likvid. Följaktligen kanske du inte kan sälja dina Värdepapper enkelt eller alls eller till kurser som är lika med eller högre än din initiala investering och

- i själva verket kan en sådan kurs vara väsentligt lägre än den ursprungliga inköpskursen. Bristande likviditet kan ha en allvarlig negativ effekt på Värdepapperens marknadsvärde.
- Förfallna belopp avseende Värdepappern är kopplade till utvecklingen för de(n) Underliggande, som är en korg med aktier. Värdet på en aktie kan sjunka såväl som stiga och värdet på en aktie på vilket datum som helst kanske inte återspeglar dess resultat under någon tidigare period. Värdet och kursvolatiliteten för en aktie kan påverka värdet på och avkastningen på Värdepappern.
 - Värdepappern skapar inte ett faktiskt intresse i eller ägande av en Underliggande och du kommer följdaktligen inte ha rösträtt eller rätt att erhålla utdelning eller distributioner eller andra rättigheter med avseende på en Underliggande. Ett Värdepapper kommer inte att representera ett anspråk mot en Underliggande och i händelse av att det belopp som betalats vid avslutande av Värdepappern är mindre än din investering, kommer du inte att åberopa någon relevant säkerhet mot en Underliggande med avseende på sådana Värdepapper. Du har inget juridiskt eller gynnsamt intresse i en Underliggande. Du kan få en lägre avkastning på Värdepappern än du skulle ha fått om du investerat direkt i en Underliggande eller genom en annan produkt.
 - Värdepapperens villkor inkluderar bestämmelser som handlar om uppskjutande av datum då kurserna på en Underliggande planeras att tas. Sådan uppskjutande eller alternativa bestämmelser för värdering som ges i villkoren för Värdepappern kan ha en negativ inverkan på värdet på sådana Värdepapper.
 - Beräkningsagenten kan göra justeringar av Värdepapperns villkor för att beakta effekten av vissa justeringshändelser som inträffar med avseende på Värdepappern eller en Underliggande och/eller säkringsarrangemang, eller kan ersätta en Underliggande med en ny aktie. Alla sådana justeringar kan ha en negativ inverkan på värdet på sådana Värdepapper.
 - Under vissa omständigheter (till exempel om beräkningsagenten fastställer att ingen beräkning, justering eller utbyte rimligen kan göras, efter en uppsägningsgrundande händelse eller vissa händelser som påverkar en Underliggande eller Emittentens säkringsarrangemang, eller av skäl som härför sig till beskattnings- eller olaglighet), kan Värdepappern avslutas i förtid. Om Värdepappern avslutas i förtid kan beloppet som betalas vara mindre än din initiala investering och du kan därför drabbas av en förlust.
 - Efter inträffandet av en Barriärhändelse (Obligatoriskt Förtida Avslutande), kommer Värdepappern att avslutas på den relevanta Obligatoriska Förtida Avslutandedagen till det relevanta Beloppet vid Obligatoriskt Förtida Avslutande och inga ytterligare belopp ska erläggas avseende Värdepappern efter den Obligatoriska Förtida Avslutandedagen. I detta fall är du utsatt för en återinvesteringsrisk, eftersom du kanske inte kan ersätta din investering i Värdepappern med en investering som har en liknande profil av chanser och risker som Värdepappern.
