

**MiFID II product governance / Retail investors, professional investors and ECPs only target market** – Solely for the purposes of the manufacturer's product approval process, the target market assessment in respect of the Securities, taking into account the five categories in item 19 of the Guidelines published by the European Securities and Markets Authority ("ESMA") on 3 August 2023, has led to the conclusion that: (i) the target market for the Securities is eligible counterparties, professional clients and retail clients, each as defined in Directive 2014/65/EU (as amended, "MiFID II"); and (ii) all channels for distribution to eligible counterparties and professional clients are appropriate; and (iii) the following channels for distribution of the Securities to retail clients are appropriate – investment advice, portfolio management, and non-advised sales, subject to the distributor's suitability and appropriateness obligations under MiFID II, as applicable. Any person subsequently offering, selling or recommending the Securities (a "distributor") should take into consideration the manufacturer's target market assessment; however, a distributor subject to MiFID II is responsible for undertaking its own target market assessment in respect of the Securities (by either adopting or refining the manufacturer's target market assessment) and determining appropriate distribution channels, subject to the distributor's suitability and appropriateness obligations under MiFID II, as applicable.

#### Most material risk factors pertaining to the guarantor

1. A substantial increase in new provisions or a shortfall in the level of previously recorded provisions exposed to credit risk and counterparty risk could adversely affect the BNP Paribas Group's results of operations and financial condition

3. The BNP Paribas Group may incur significant losses on its trading and investment activities due to market fluctuations and volatility
4. The BNP Paribas Group's access to and cost of funding could be adversely affected by a resurgence of financial crises, worsening economic conditions, rating downgrades, increases in sovereign credit spreads or other factors
5. Adverse economic and financial conditions have in the past had and may in the future significantly affect the BNP Paribas Group and the markets in which it operates
6. Laws and regulations adopted in recent years, as well as current and future legislative and regulatory developments, may significantly impact the BNP Paribas Group and the financial and economic environment in which it operates.

#### What are the key risks that are specific to the securities?

#### Most material risk factors specific to the securities

There are also risks associated with the Securities, including:

##### 1. Risks related to the structure of the securities:

The return on the Securities depends on the performance of the Underlying Reference(s) and the capital protection applies only at Maturity.

##### 2. Risks related to the underlying and its disruption and adjustments:

Index Securities are linked to the performance of an underlying index (an "Index"), which may reference various asset classes such as, equities, bonds, currency exchange rates or property price data, or could reference a mixture of asset classes. Investors in Index Securities face the risk of a broader set of circumstances that mean that the assets underlying the Index do not perform as expected compared to an investment in conventional debt securities. Accordingly, the return on an investment in Index Securities is more likely to be adversely affected than an investment in conventional debt securities.

Exposure to indices, adjustment events and market disruption or failure to open of an exchange may have an adverse effect on the value and liquidity of the Securities. An exchange traded instrument (an "ETI") may invest using sophisticated techniques, such as leverage or short selling or in complex financial instruments such as derivatives (swaps, options, futures), securities lending transactions, repurchase or reverse repurchase agreements or foreign exchange instruments. If the investment strategy of the ETI is not successful it will have a negative impact upon the performance of the ETI, and consequently, could have a negative impact on the value of the ETI Securities and the return investors may receive. Holders of ETI Securities have no right to participate in the ETI, whether by voting or in any distributions. Accordingly, the return a Holder of ETI Securities receives could be less (and could be significantly less) than a direct investment in an ETI.

Exposure to an exchange traded instrument, similar market risks to a direct investment in an exchange traded instrument, potential adjustment events or extraordinary events affecting the exchange traded instrument and market disruption or failure to open of an exchange may have an adverse effect on the value and liquidity of the Securities.

##### 3. Risks related to the trading markets of the securities:

The trading price of the Securities may be affected by a number of factors including, but not limited to, the relevant price, value or level of the Underlying Reference(s), the time remaining until the scheduled redemption date of the Securities, the actual or implied volatility associated with the Underlying Reference(s) and the correlation risk of the relevant Underlying Reference(s). The possibility that the value and trading price of the Securities will fluctuate (either positively or negatively) depends on a number of factors, which investors should consider carefully before purchasing or selling Securities.

##### 4. Legal risks:

The terms of the Securities will contain provisions for calling meetings of holders of such Securities to consider matters affecting their interests generally. These provisions permit defined majorities to bind all holders, including holders who did not attend and vote at the relevant meeting and holders who voted in a manner contrary to the majority.

#### Mest väsentliga riskfaktorer som gäller garanten

1. En väsentlig ökning i nya avsättningar, eller ett underskott i nivån på tidigare redovisade avsättningar som varit exponerade för kreditrisker och risker vad gäller motparter skulle negativt kunna påverka BNP Paribas Grupp verksamhetsresultat och finansiella ställning.
2. BNP Paribas-koncernens riskhanteringspolicyer, förfaranden och metoder kan exponera den för oidentifierade eller oförutsedda risker som kan leda till materialförluster.
3. BNP Paribas Grupp kan ådra sig väsentliga förluster vid handels- och investeringsverksamhet till följd av valutakursfluktuationer och volatilitet.
4. BNP Paribas Grupp tillgång till och kostnader för finansiering skulle kunna påverkas negativt av nya ekonomiska kriser, sämre konjunkturläge, lägre kreditvärdering, ökning av kreditspreaden eller andra faktorer.
5. Negativa ekonomiska och finansiella förhållanden har tidigare haft och kan i framtiden ha en betydande inverkan på BNP Paribas-koncernen och de marknader på vilka den verkar.
6. Lagar och förordningar som antagits under de senaste åren, liksom nuvarande och framtida lagstiftnings- och regleringsutvecklingar, kan avsevärt påverka BNP Paribas-koncernen och den finansiella och ekonomiska miljön i vilken den verkar.
7. Skulle BNP Paribas-koncernen misslyckas med att implementera sina strategiska objektiva eller med att uppnå sina publicerade finansiella objektiva, eller om dess resultat inte följer förväntade trender, kan marknadspriset på dess värdepapper påverkas negativt.

#### Vilka är de centrala riskerna som är specifika för värdepapperna?

##### Mest väsentliga riskfaktorer som är specifika för värdepapperna

Det finns även risker som är förknippade med Värdepapperna, inklusive:

##### 1. Risker som är relaterade till värdepappernas struktur:

Avkastningen på värdepapperna beror på avkastningen på de underliggande referenserna och kapitalskyddet endast tillämpas på förfallodagen.

##### 2. Risker som är relaterade till de underliggande och dess avbrott och justeringar:

Indexvärdepapper är kopplade till utvecklingen på underliggande index (ett "index"), som kan innehålla olika tillgångsklasser såsom aktier, obligationer, utländsk valuta eller värde på fastigheter eller kan referera till en blandning av tillgångsklasser. Investerare i Indexvärdepapper står inför risker som har ett bredare spektrum, vilket betyder att tillgångarna som Index baserar sig på inte utvecklar sig som man tror jämfört med en investering i en konventionell obligation. Därför är avkastningen på en investering i Indexvärdepapper antagligen mer negativt än en investering i konventionella obligationer.

Exponering mot index, justerade händelser och marknadsavbrott eller misslyckad handel kan ha negativa effekter på värdepapperets värde och likviditet. Ett börshandlat instrument (en "ETI") kan investera och använda sofistikerade tekniker som hävstångsverkan eller blankning eller genom komplexa finansiella instrument som derivat (swappar, optioner, terminer), transaktioner med lån av värdepapper, återköp eller omvända återköpsavtal eller utländska växelkursinstrument. Om investeringsstrategin på en ETI inte lyckas kommer det att ha en negativ effekt på ETI:n och därför kan den ha en negativ effekt på ETI-värdepapperet och dess avkastning. Innehavare av ETI-värdepapper har ingen rätt att delta i ETI:n varken genom röstning eller få någon utdelning. Avkastningen för en Innehavare av ETI kan därför vara mindre (och kan vara väsentligt mindre) än en direktinvestering i en ETI.

Exponering mot börshandlade instrument, likartad marknadsrisk gentemot en direktinvestering i börshandlade instrument, potentiella justeringshändelser eller extraordinära händelser som påverkar börshandlade instrument och marknadsavbrott eller misslyckat försök att handla kan ha en negativ effekt på Värdepappernas värde och likviditet.

##### 3. Risker som är relaterade till handel med värdepapper:

Kursen på Värdepapper kan påverkas av ett antal faktorer inklusive, men inte begränsat till, det gällande priset eller nivån på Underliggande Referenser, återstående tid på Värdepapperets planerade inlösendag, aktuell eller implicit volatilitet som är förknippat med den Underliggande Referensen och risken med det inbördes förhållandet till gällande Underliggande Referens(er). Möjligheten att Värdepapperets kurs kommer att fluktuera (antingen uppåt eller nedåt) beror på ett antal faktorer som investeraren nogga borde överväga innan köp eller försäljning av Värdepapper.

##### 4. Rättsliga risker:

Villkoren för Värdepapper kommer innehålla bestämmelser för hur man ska kalla till möten mellan innehavare av aktuella värdepapper för att belysa frågor som generellt sett påverkar deras intressen. Dessa bestämmelser ger angivna majoriteter rätten att fatta beslut som binder alla innehavare, inklusive innehavare som inte har närvarat eller röstat på aktuellt möte och innehavare som röstat mot majoriteten.

Förvaltaren och dess dotterbolag kan också ha varit verksamma, och kan även i framtiden bli verksamma vad gäller investeringar och börshandel och kan utföra andra tjänster för Emittenten och Garanten och deras respektive dotterbolag.

Olika företag inom BNPP-koncernen (inklusive Emittenten och Garanten) och Dotterbolag åtar sig olika roller i samband med Värdepapperna, inklusive Värdepappernas Emittent och Värdepappernas Beräkningsombud och kan även utföra handelsrelaterade verksamheter (inklusive risksäkringsverksamhet) som hänför sig till Underliggande och andra instrument eller derivatprodukter baseras på eller som är relaterade till de Underliggande. Detta kan förorsaka möjliga intressekonflikter.

BNP Paribas Financial Markets SNC som verkar som Förvaltare och Beräkningsombud, är ett Dotterbolag till Emittenten och Garanten och potentiella intressekonflikter kan finnas mellan Värdepappernas innehavare, inklusive och med hänsyn till vissa beslut och bedömningar som Beräkningsombuden måste göra. De ekonomiska intressena hos Emittenten och hos BNP Paribas Financial Markets SNC såsom Förvaltare och Beräkningsombud , är potentiellt motsatta till intressena hos Innehavare av Värdepapperna.

Annat än vad som nämnts ovan och såvitt Emittenten vet, har ingen person som är involverad i Värdepappersemissionerna något intresse i erbjudandet, inklusive de motstridiga intressena.
